435-919-3008
FAX

doakden@NBSUT.com
E-mail address

* If you are applying for multiple facilities designation, include an additional sheet providing the * information for each facility to be covered.

Environmental Permits

You are eligible to participate in Clean Utah if you are governed by federal, state, or local environmental regulations.

For Permitted Business:

List the environmental permits you hold. Attach additional sheets if more space is needed.

Type of Permit	Permit Number	Issuing Agency
Title V (Assigned to Vulcraft, Brigham City, UT)	300030002	Utah Department of Environmental Quality
MSGP for Storm Water Discharges associated with Industrial Activities – Group 3	UTR000000	Utah Department of Environmental Quality

For Small Business:

In some cases, small businesses are exempted from permit requirements because of the size of the operation. They may still be required to meet certain federal or state environmental regulations, such as record keeping and pollution prevention steps.

Let us know, in the space below, which environment regulations apply to you and what steps you take to assure your operation meets applicable requirements.

We have a current SPCC, SWPPP, UDEQ Water Permit and are managing our BMP's for the SWPPP

Compliance Eligibility Requirement

Clean Utah! seeks to reward those who are willing to go beyond what is required by rule or statute to prevent or reduce pollution. You are eligible to participate provided you:

- have not been in Significant Noncompliance of Drinking Water, Water Quality, or Hazardous Waste regulations, had a High Priority Violation of Air Quality regulations, had a Severity Level I, II, or III Violation of Radiation Control regulations, or any equivalent violation of any state, federal, or local environmental regulation in the past year and you have not had a total of three such violations in the past three years;

- have not had any criminal violation of environmental regulations for the past five years and are not currently the focus of an environmental criminal investigation.

- have no other open or unresolved violation(s).

Do you meet the compliance eligibility requirement? / X / Yes /__/ No

Note:

Compliance history and status will be determined by the appropriate DEQ program(s), in consultation with EPA and the Local Health Department.

Statement of Interest

In the space below, let us know why you are interested in becoming a Clean Utah facility and what you hope to accomplish in the program.

Nucor Building Systems, Utah, LLC is part of the largest recycling company in the world, Nucor Corporation. We value the environment and the community in which we work and live in. Protecting the environment is critical to our operations and the company's long-term success. Our Environmental Motto is G.R.E.E.N, which stands for: (G) Great Expectations in all aspects of our business; (R) Responsibility to preserve our local environment; (E) Environmental Excellence, Nucor Building Systems will uphold it's commitment to Environmental Excellence; (E) Effective Practices: All Nucor Building Systems Employees will participate in Effective environmental practices; and (N) Neighborhood Outreach Programs to our communities as proactive environmental stewards.

Terms and Conditions

Acceptance as a Clean Utah Entry Level participant entitles the facility to technical assistance in developing an EMS and to designation on the DEQ website and other publicity as one who is interested in and has started the ***Clean Utah*** process.

Each Clean Utah Entry Level participant will develop and implement an Environmental Management System (EMS). Several EMS models currently exist, including ISO-14001, and the applicant is free to select the model which best meets the facility's circumstances. Any model selected must include each of the 12 components outlined in the Clean Utah policy. (Available on line at www.deq.utah.gov/cleanutah)

To remain in the program, an EMS must be completed and operational within two years of being accepted into the program. Those who desire to move onto the Partner Level must document that the EMS has been implemented for one full cycle. In addition, two projects designed to significantly reduce or prevent pollution must be proposed. Ideally, these projects should be based on aspects identified in the EMS process. (Additional information is available online.)

Clean Utah participants agree to remain in compliance with applicable environmental regulations. Failure to do so may be grounds for removal.

Certification Statement

(to be signed by a senior facility manager)

I have read and agree to the terms and conditions for participation in the Clean Utah program as described in the Clean Utah policy and application. I have personally examined and am familiar with the information contained in this application and it is, to the best of my knowledge and based on reasonable inquiry true, accurate and complete and I have no reason to believe the facility would not meet all program requirements. I agree that Utah DEQ's decision whether to accept participants into or remove them from Clean Utah is wholly discretionary.

I am a senior facility manager and fully authorized to execute this statement on behalf of the corporation or other legal entity whose facility is applying to this program.

Signed
