Here are my comments for improvement in Utah's Air Quality.

1) Tier 3 fuels for all vehicles
2) All Refineries must be updated to latest clean air technology by and no more expansion to existing refineries in Salt Lake County
3) No INLAND Port without extensive environmental impact studies or zero carbon plan
4) No more expansion to gravel pits in Utah or Salt Lake Counties.
5) No more draining of Utah basin aquifers for development in Nevada
6) Higher gas tax to limit driving and support expansion of public transportation
7) Carbon Tax for big polluters to help pay for expansion of public transportation and clean energy options.
8) Ban wood burning and enforce with high fines during yellow or red days. Offer assistance for people to change out their wood heating stoves to gas.

Thank you,
Terri Gilfillan
