---

For persons who performed inspections and recommended project designer carry out response actions (except for operations and maintenance) the local education agency used or will use persons who have been accredited by a state which has accepted a contractor accreditation plan under section 206(b) of TSCA Title II or is accredited by an EPA approved course under section 206(c) of TSCA Title II. In addition, the LEA has considered whether any conflict of interest may arise from the interpersonal relationship among certified personnel, such as abatement activities being performed by an inspector or management planner and whether that should influence the selection of certified personnel to perform activities under this AHERA (Asbestos Hazard Emergency Response Act) Program.

The signatures below certify that the general local educational agency (LEA) responsibilities, as stipulated by 40 CFR Part 763.84 have been met or will be met.
