Here are my comments for improvement in Utah's Air Quality.

- 1) Tier 3 fuels for all vehicles
- 2) All Refineries must be updated to latest clean air technology by and no more expansion to existing refineries in Salt Lake County
- 3) No INLAND Port without extensive environmental impact studies or zero carbon plan
- 4) No more expansion to gravel pits in Utah or Salt Lake Counties.
- 5) No more draining of Utah basin aquifers for development in Nevada
- 6) higher gas tax to limit driving and support expansion of public transportation
- 7) Carbon Tax for big polluters to help pay for expansion of public transportation and clean energy options.
- 8) Ban wood burning and enforce with high fines during yellow or red days. Offer assistance for people to change out their wood heating stoves to gas.

Thank you,
Terri Gilfillan
