Hi, I know you are taking opinions at this time regarding the proposed changes to laws regulating air quality in Utah. I have gone to this website: <https://deq.utah.gov/air-quality/air-quality-rule-plan-changes-open-public-comment>, but frankly don't understand the things being proposed. It would help if there could be some easier explanations for people about what is being proposed. But I would like to share my feedback that I think improving air quality in Utah is one of the top issues facing our state, and deserving of some negative effects on our economy if needed to make it cleaner. Thank you for your efforts!
