Subject: R307-313 Support

To: <rwood@utah.gov>

Mr. Wood,

As physicians we are very concerned with the effects of air quality on our patients and family's health. After moving to the Salt Lake Valley 2 years ago, we were disturbed to see the reality of air quality in our new home environment. We personally try to do everything we can on a daily basis to avoid contributing to this health threatening situation. We live across the road from a Hot Mix Asphalt plant and see on a daily basis the emissions it produces.

We applaud and support the efforts by the Division of Air Quality to reduce these harmful emissions. We strongly support R307-313. VOC and Blue Smoke Controls for Hot Mix Asphalt Plants.
