Dear Rules Coordinator Thomas Gunter,

Please take more action to write a stronger PM2.5 SIP to move us from nonattainment to attainment under federal standards. I'd particularly like to see courage to prohibit winter wood-burning, reduce dust pollution, and use more monitoring locations.

You already know how our health and economy are affected by our bad air. Please lead out more. Utahns depend on you.

Most sincerely,  
Dixie Huefner

Sincerely,  
Dixie Huefner
