Boil Order Issued for Soldier Hollow Complex

SALT LAKE CITY — The Charleston Water Conservancy District is issuing a boil order for the Soldier Hollow Complex; which includes Soldier Hollow Golf Course, Soldier Hollow Grill and the Soldier Hollow Olympic Venue; after E. coli was detected in the water supply Wednesday.

A construction accident resulted in a break in the distribution system (pipes), which resulted in drinking water contamination at the Soldier Hollow Complex on Tuesday, Aug. 13. The contamination was not detected until Wednesday afternoon, Aug 14.

Visitors to the Soldier Hollow Complex venues between 3:30 p.m. on Aug. 13 and 6 p.m. Aug. 14 are being asked to monitor their health for possible E. coli infection. These bacteria can make you sick, and are a particular concern for people with weakened immune systems.

E. coli are bacteria whose presence indicates that the water may be contaminated with human or animal wastes. Microbes in these wastes can cause diarrhea, cramps, nausea, headaches, or other symptoms. They may pose a special health risk for infants, young children, some of the elderly and people with severely compromised immune systems.

If you visited the affected area on Tuesday or Wednesday and experience any of these symptoms and they persist, you may want to seek medical advice.

Teams from Charleston Water Conservancy District, the Soldier Hollow Complex and Wasatch County Health Department are working to correct the issue.
