

Water Quality Parameter Monthly Report Form

For Public Drinking Water Systems with installed corrosion control treatment

System Name: _____
 Operator: _____

System Number: _____
 Phone: _____

Water systems treating for corrosion control need to report test results of the following WQP samples at each entry point to the distribution system from locations representative of each source after treatment, at least once every 2 weeks (bi-weekly):

- pH;
- When alkalinity is adjusted, a reading of the dosage rate of the chemical used to adjust alkalinity (for limestone bed, measure bed depth) and the concentration of alkalinity; and
- When an inhibitor is used, a reading of the dosage rate of the inhibitor used and the concentration of orthophosphate or silicate (whichever is used).

Report for the month of: _____ of the year _____

Day	Sample Location	Acidity pH	Alkalinity Dosage	Alkalinity Conc. mg/L	Orthophosphate or Silicate Dosage	Orthophosphate or Silicate Conc. mg/L	Comments
