

PUBLIC NOTICE of COMPLETION
Five-Year-Review of Midvale Slag Superfund Site
Midvale City, Salt Lake County, Utah

Summary: Fourth Five-Year Review Completed

The Utah Department of Environmental Quality and the U.S. Environmental Protection Agency (EPA) Region 8 has completed the fourth Five-Year Review for the Midvale Slag Superfund Site. Five-year reviews are required by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) when hazardous substances remain on site above levels that permit unrestricted use and unlimited exposure. Five-Year reviews are conducted to evaluate the site remedy and to determine whether site conditions remain protective of human health and the environment.

Protectiveness Statement: EPA has determined in this Five-Year Review the cleanup at the Midvale Slag Superfund site is protective. This means that the current remedy is protective of human health and the environment and allows for residential, recreational and commercial reuse. Drinking water is provided by the Jordan Valley Water Conservation District (<https://jvwcd.org/water/wqrpge>) with groundwater use being restricted by the Salt Lake Valley Ground Water Management Plan and the Midvale City ordinance. The ordinance also describes the procedures for workers handling soils at depth and Midvale City staff oversees any redevelopment projects. This Five-Year Review Report was signed April 8, 2019.

A copy of the review is available at DERR Offices located on the 1st Floor, at 195 North 1950 West, Salt Lake City, Utah 84114. Please call for an appointment to review records at (801) 536-4100, Monday through Friday, from 8:30 A.M. to 4:30 P.M. The document is also available electronically at the UDEQ/DERR website at <http://www.environmentalresponse.utah.gov/>
