

ENVIRONMENTAL RESPONSE
& REMEDIATION

PUBLIC NOTICE of COMPLETION
Five-Year Review of the Rose Park
Sludge Pit Superfund Site
Salt Lake County, Utah

Summary: Seventh Five-Year Review Completed

The Utah Department of Environmental Quality, Division of Environmental Response and Remediation (UDEQ/DERR), and the U.S. Environmental Protection Agency (EPA), Region 8, have completed the seventh Five-Year Review for the Rose Park Sludge Pit Superfund Site. Five-Year Reviews are required by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) when hazardous substances remain on site above levels that permit unrestricted use and unlimited exposure. Five-Year Reviews are conducted to evaluate the site remedy and to determine whether site conditions remain protective of human health and the environment.

Protectiveness Statement: The EPA has determined in the Five-Year Review that the cleanup at the Rose Park Sludge Pit Superfund Site is protective of human health and the environment in the short-term. The engineered cap prevents exposure to wastes contained within the repository and groundwater monitoring and sampling data demonstrates that the slurry wall prevents off-site migration of contaminants. An Environmental Covenant prohibits the development and use of surface water and groundwater and restricts excavation activities that would impact the cap and slurry wall. However, in order for the Site to be protective in the long term, a document indicating ICs required and how they will be maintained needs to be written, and a determination needs to be made and documented as to who will be responsible for future Operations and Maintenance activities and groundwater monitoring.

This Five-Year Review Report was signed September 1, 2022 and the next Five-Year Review is required five years from the completion date. A copy of the review is available at the DERR Offices located on the 1st Floor, at 195 North 1950 West, Salt Lake City, Utah, 84114. Please call for an appointment to review records at (801) 536-4100, Monday through Friday, from 8:30 A.M. to 4:30 P.M. The document is also available electronically at the UDEQ/DERR website at <http://www.environmentalresponse.utah.gov/>.
