

PUBLIC NOTICE of COMPLETION
Five-Year Review of the Portland Cement
(Kiln Dust 2 & 3) Superfund Site
Salt Lake County, Utah

Summary: Fifth Five-Year Review Completed

The Utah Department of Environmental Quality, Division of Environmental Response and Remediation (UDEQ/DERR), and the U.S. Environmental Protection Agency (EPA), Region 8, have completed the fifth Five-Year Review for the Portland Cement (Kiln Dust 2 & 3) Superfund Site. Five-Year Reviews are required by the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) when hazardous substances remain on site above levels that permit unrestricted use and unlimited exposure. Five-Year Reviews are conducted to evaluate the site remedy and to determine whether site conditions remain protective of human health and the environment.

Protectiveness Statement: The EPA has determined the remedy implemented at the Portland Cement (Kiln Dust 2 & 3) Superfund Site currently protects human health and the environment. Land Use Easements that act as Institutional Controls restrict groundwater use and provide procedures for managing contaminated soils during redevelopment activities. UDEQ/DERR provides oversight of redevelopment activities that would impact groundwater monitoring wells and disturb contaminated soils. This Five-Year Review Report was signed September 15, 2022 and the next Five-Year Review is required five years from the completion date.

A copy of the review is available at the DERR Offices located on the 1st Floor, at 195 North 1950 West, Salt Lake City, Utah, 84114. Please call for an appointment to review records at (801) 536-4100, Monday through Friday, from 8:30 A.M. to 4:30 P.M. The document is also available electronically at the UDEQ/DERR website at <http://www.environmentalresponse.utah.gov/>

If you would like more information about the review, please contact:
