

UTAH PETROLEUM BROWNFIELDS 2012 PROJECT FACT SHEET

LEWISTON FAIRGROUNDS

190 EAST CENTER ST
LEWISTON, UT

PARTNERS:

UTAH DEPARTMENT OF
ENVIRONMENTAL QUALITY (UDEQ)

U.S. ENVIRONMENTAL PROTECTION
AGENCY (EPA)

BACKGROUND

A former gasoline service station property was donated to Lewiston City some time ago. Lewiston City became concerned that the former underground storage tank system may still be abandoned on-site, and/or the site may have been contaminated by petroleum during its operation as a gasoline station. Lewiston City was concerned about long-term liability issues and potential cleanup costs. The city requested assistance from UDEQ to assess the property to determine if there is any environmental contamination present that may require cleanup actions prior to redevelopment activities.

ACCOMPLISHMENTS

- UDEQ completed a subsurface investigation at the property.
- Although the former dispenser island and a hoist remain onsite, no significant petroleum hydrocarbon impacts were discovered at the site.
- NFA was issued to Lewiston City.
