Publication Number: EPA-560-F-23-219
Publication Date: May 2023

Overview of the EPA Brownfields Program

EPA's Brownfields Program empowers states, communities, and other stakeholders to work together to prevent, assess, safely clean up, and sustainably reuse brownfield sites. A brownfield site is real property, the expansion, redevelopment, or reuse of which may be complicated by the presence or potential presence of a hazardous substance, pollutant, or contaminant. The Small Business Liability Relief and Brownfields Revitalization Act of 2002, as amended by the Brownfields Utilization, Investment and Local Development Act of 2018, was passed to help states and communities around the country clean up and revitalize brownfield sites. Under this law, EPA provides financial assistance to eligible applicants through five competitive grant programs: Multipurpose Grants, Assessment Grants, Revolving Loan Fund Grants, Cleanup Grants, and Job Training Grants. Additionally, funding support is provided to state and tribal response programs through a separate mechanism.

Cleanup Grant

\$495,200

EPA has selected the Salt Lake City Corporation for a Brownfields Cleanup Grant that will be funded by the Bipartisan Infrastructure Law. Grant funds will be used to clean up the 0.34-acre Former Schovaers Electronics site at 22 South Jeremy Street in the City of Salt Lake. The cleanup site was originally an electrical supply company until 1972 and operated as an electroplating facility from 1977 to April 2017 and an appliance repair shop from 2019 until 2022. It is contaminated with heavy metals and volatile organic compounds. Grant funds also will be used to develop a Community Involvement Plan and conduct four community meetings and other community outreach activities.

For further information, including specific grant contacts, additional grant information, brownfields news and events, and publications and links, visit the EPA Brownfields Web site (<http://www.epa.gov/brownfields>).

The information presented in this fact sheet comes from the grant application; EPA cannot attest to the accuracy of the information. The cooperative agreement is negotiated after the selection

announcement. Therefore, the funding amount and activities described in this fact sheet are subject to change.
