APPENDIX D

FIELD SAMPLE DATA

Tooele South
Field Sample Data

FLAG CODES:

A = Analyte found in trip blank as well as in field sample.
B = Analyte found in the method blank or QC blank as well as the sample.
C = Analysis was confirmed.
D = Duplicate analysis.
F = Sample filtered prior to analysis.
G = Analyte found in rinse blank as well as in field sample.
H = Out of control but data acceptable due to high recoveries.
I = Interferences in sample cause quantitation and/or identification to be suspect.
J = Value is estimated.
K = Reported results are affected by interferences or high background.
L = Out of control, data rejected due to low recoveries.
M = Duplicate (high) spike analysis not within control limits.
N = Tentatively identified compound (match greater than 70%).
P = Results less than reporting limit but greater than instrument detection limit.
Q = Sample interference obscured peak of interest.
R = Non-target compound analyzed for but not detected (GC/MS methods).
S = Non-target compound analyzed for and detected (GC/MS methods).
T = Non-target compound analyzed for but not detected (non-GC/MS methods).
U = Analysis is unconfirmed.
V = Sample subjected to unusual storage/preservation conditions.
W = Single analyte required from multi-analyte method.
X = Analyte recovery outside of certified range but within acceptable limits.
Y = Tentatively identified compound (match less than 70%).
Z = Non-target compound analyzed for and detected (non-GC/MS methods).
1 = Result less than CRL but greater than Criteria of Detection.
2 = Ending calibration not within acceptable limits.
3 = Internal standard(s) not within acceptable limits.
7 = Low spike recovery is not within control limits.

d = Rust E&I duplicate. Duplicates that were not flagged by lab as duplicates.

DATA QUALIFIER:

I = Low-spike recovery is high.
J = Low-spike recovery is low.
K = Missed holding time for extraction and preparation.
L = Missed holding time for sample analysis.
M = The high-spike recovery is high.
N = The high-spike recovery is low.
Q = Surrogate recovery is outside of normal limits (field samples only).
R = Data is rejected.

BACKGROUND FLAG:

B = Above Background
b = Below Background
D = Detected Analyte, no comparison possible
M = Above respective MCL
m = Below respective MCL
c = No respective MCL

QC FLAG:

>10x = Greater than 10 times the respective Blank.
>5x = Greater than 5 times the respective Blank.
<10x = Less than 10 times the respective Blank.
<5x = Less than 5 times the respective Blank.
where x, is: R=rinse blank, T=trip blank, F=field blank or M=method blank.

NOTES

The data is ordered by:
1st = SWMU
2nd = Site, in relation to Table of Contents in the RFI.
3rd = Media Type
4th = Analyte (Test Name) Group
5th = Sample location (Site ID)
6th = Analyte (Test Name)
