Dave:

See the attached revised Cell 4A O&M Plan. I have attached a redlined PDF and clean PDF and clean Word version. I am also attaching a Word version for the DMT Plan.

Harold:
Yes. I believe word versions of the plans would be useful. Thanks. - -

Dave:

I will forward the changes to you this morning. Do you also want Word versions of the documents as well as PDF's?

Subject: Re: Revised Cell 4A O & M Plan

Harold,

We have the following comment on the O&M plan submitted September 12, 2008:

On page 8 of the O&M Plan, there is explicitly stated weekly LDS water level data collection and evaluation times. Parallel verbiage needs to be added for collection and evaluation of the measured LDS flow rate. To do this, we suggest following underlined wording be inserted into the paragraph on the Leak Detection System on page 8 as follows:

"Within 24 hours after collection of the weekly water level and pump flow data, the information will be evaluated to ensure that: 1) the water level in the leak detection sump did not exceed the allowable level (5556.14 feet amsl) and 2) the average daily flow rate from the LDS did not exceed the maximum daily allowable LDS flow rate at any time during the reporting period."

I believe once this issue is resolved, we will be ready to approve the DMT and O&M Plans, as well as authorize operation of Cell 4A.

We request the O&M Plan be revised and submitted with the above consideration. If you have any questions please contact me. -

Loren and Dave:

See the attached documents. I believe this responds to all your comments in the September 10th letter. I will call you Monday morning.
