May 15, 2009

Mr. Dane Finerfrock, Executive Secretary  
Utah Radiation Control Board  
Utah Department of Environmental Quality  
168 North 1950 West  
P.O. Box 144810  
Salt Lake City, UT 84114-4810

Dear Mr. Finerfrock:

**Re: Interrogatory, Renewal Application for Radioactive Materials License (RML)  
No.UT1900479—Submittal of Draft Revised Radiation Safety Training Program  
(Including Respiratory Protection Training Program Requirements)**

Reference is made to the Executive Secretary's correspondence of November 24, 2008, which sets out the first round of Interrogatories pertaining to the White Mesa Mill's (the "Mill's") February 2007 License Renewal Application, and to Denison Mines (USA) Corp.'s ("Denison's") February 5, 2009 response to that letter.

In your November 24, 2008 letter you stated as Interrogatory 25:

*Demonstrate that the Radiation Safety Program covers all of the material that is outlined in NRC Reg. Guide 8.31 Section 2.5 Radiation Safety Training. Explain in detail how this training is documented.*

In our February 5, 2009 response we agreed that the Mill's Radiation Safety Training Program is currently not structured so as to allow for an easy comparison of the topics covered and the requirements of Reg. Guide 8.31. We committed to rewrite the Mill's Radiation Safety Training Program so that the topics covered line up better with the topics outlined in Section 2.5 of Reg. Guide 8.31 to allow for a more direct comparison of the training program to those requirements.

In your November 24, 2008 letter, you also stated in Interrogatory 26:

*Demonstrate that the Respiratory Protection Program covers all of the material that is outlined in NRC Reg. Guide 8.15 Section 5.2 Training.*

In our February 5, 2009 response we agreed that the Mill's Respiratory Protection Training Program is currently not structured so as to allow for an easy comparison of the topics covered

and the requirements of Reg. Guide 8.15. As with the Radiation Safety Training Program, we committed to rewrite the Mill's Respiratory Protection Training Program so that the topics covered line up better with the topics outlined in Section 5.2 of Reg. Guide 8.15 to allow for a more direct comparison of the training program to those requirements.

In correspondence with your office on May 4, 2009 we advised that, in preparing the revised Radiation Safety Training Program we realized that it would be preferable to combine the Respiratory Protection Training Program into the Radiation Safety Training Program. This better reflects the way the training is actually done at the Mill, and will result in one comprehensive program.

Enclosed please find two copies of Denison's draft revised Radiation Safety Training Program, which includes the Mill's respiratory protection training program requirements. This draft Program has been updated to better track the requirements of Section 2.5 of Reg. Guide 8.31 and Section 5.2 of Reg. Guide 8.15, in order to address your concerns.

The revised Radiation Safety Training Program will replace the existing Addendum 9 of White Mesa Mill SOP Book #13 Training Manual and will become the new Addendum 9 to that Manual. Because this revised Program includes the respiratory protection training program requirements, it will supersede Section 2.3 of the Mill's Respiratory Protection Program, which will be deleted and replaced with a reference to the fact that the Mill's respiratory protection training program requirements are included in the Mill's Radiation Safety Training Program.

We will provide you with a CD that contains an electronic copy of the draft revised Radiation Safety Training Program within the next two business days.

If you should have any questions or require additional information, please contact the undersigned.

Yours very truly,

**DENISON MINES (USA) CORP.**
