(Licensee) 11e.(2) Byproduct License (RML UT1900479).

If approved, the proposed License Amendment will allow Energy Fuels Resources (USA) Inc. (EFRI) to receive and process up to a total of 4,500 tons (dry weight) of uranium material as alternate feed material from the Dawn Mining Company Midnite Mine Site, located in Wellpint, Washington. EFRI, formerly Denison Mines (USA) Corp (DUSA), submitted a request to the DRC to amend RML No. UT1900479, in a letter dated April 27, 2011 (amendment request).

EFRI is requesting that the uranium material be authorized for receipt and processing at the White Mesa Mill as alternate feed material based on its uranium content. Byproduct (residuals) from the extraction of source material would be disposed within the Mill's active lined uranium tailings management/disposal cells.

A draft License along with a Statement of Basis and Safety Evaluation Report (SER) describing the License change(s) and environmental analysis are available for review and/or copying between 8:00 a.m. and 5:00 p.m., Monday through Friday, at the address listed below. In addition, the amendment request and related documents, draft License, Statement of Basis, and SER are available on the Division website at:
