

Utah Department of Environmental Quality,

I believe that our state should work to protect future generations from radiological exposure and contamination. I therefore stand behind and support the Board's course of action to devise a new rule to ensure that no depleted uranium comes to our State in advance of the completion of thorough public health studies and performance assessments. A new rule should also take into account when levels of peak dosage occur as well as likely geological processes such as flooding and erosion.

Thank you  
Sandra Hays
