As a citizen of Utah, I firmly believe that our state should work to protect future generations from radiological exposure and contamination. I therefore stand behind and support the Board's course of action to devise a new rule to ensure that no depleted uranium comes to our state in advance of the completion of thorough public health studies and performance assessments. A new rule should also take into account when levels of peak dosage occur as well as likely geological processes such as flooding and erosion.

Thank you for your time and effort;

  
Tanya Andrew
