MAILING ADDRESS: 8215 South 1300 West, West Jordan, UT 84088
TELEPHONE NUMBER: (801) 565-4300

BACKGROUND
The Southwest Groundwater Project will remediate groundwater contaminated from historic mining activities in southwest Salt Lake County. The project will extract groundwater with elevated total dissolved solids (salts) via a series of deep aquifer wells and purify the extracted water utilizing a Reverse Osmosis (RO) treatment process. The project will also extract groundwater from shallow wells with elevated total dissolved solids that have not been impacted by mining activities. The Southwest Groundwater project is owned and operated by the Jordan Valley Water Conservancy District (JVWCD). The drinking quality water generated will be distributed by JVWCD to its member agencies for supply to their drinking water systems. RO byproduct water (i.e. concentrate), containing the extracted salts from the treated water, will be routed via a 21 mile pipeline to the Transitional Waters and Gilbert Bay of Great Salt Lake. Excess feed water from pressure relief valves of the shallow aquifer treatment trains of the RO plant will be discharged to the Jordan River.
