Mark Atencio, JWCD  
Renette Anderson, DEQ

### **Summary of Facilitated Discussion - Criteria Development (from flipcharts)**

Meet objectives of project  
Affordable-cost  
Technically feasible & successful (proven technology)  
Socially legitimate (don't create new problem)  
Environmentally legitimate  
Cannot infringe on rights of individuals  
Flexibility  
Supports consent decree  
Thorough time to think thru alternatives  
Balance time-not rushed decision, but meet time constraints  
Aesthetically pleasing (compliment surroundings)  
Legally acceptable w/in permitting  
Consider other permits & process  
Don't create more problems for 1 organization  
Solution workable for 40 years  
Don't preclude ongoing service to public water delivery after 40 years  
Scientific uncertainty err on side of caution  
Decisions for this project guide & set precedent for Phase II  
Durability & accountability to future generations  
Compatible with Phase II objectives  
Not significant impact, Kennecott's development capability

Consider other environmental factors  
Incorporate monitoring w/flexibility to change  
Cost to keep operating  
Balance caution (science) w/economically feasibility  
Consider balancing economic w/environmental (ex. GSL)  
Global vs. Local approach w/in permitting structure and ability  
Peer review by experts in scientific community
