SALT LAKE CITY, UTAH 84114-4870

Ground Water Discharge and Construction Permit
Permit No. UGW390005

In compliance with the provisions of the Utah Water Quality Act, Title 19, Chapter 5, Utah Code Annotated 1953, as amended, the Act,

Norbest Inc.
Moroni Wastewater Treatment Plant
P.O. Box 308
Moroni, Utah 84646

hereafter after referred to as Permittee, is granted a Ground Water Discharge and Construction Permit for the operation of a 15 million gallon anaerobic lagoon. The lagoon is located on a tract of land encompassed in Section 16, Township 15 South, Range 3 East, Salt Lake Base and Meridian, Sanpete County, Utah.

This permit is based on representation made by the Permittee and other information contained in the administrative record. It is the responsibility of the Permittee to read and understand all provisions of this permit.

The facility shall be maintained and operated in accordance with conditions set forth in the permit and the Utah Administrative Rules for Ground Water Quality Protection (R317-6).

This permit shall become effective on

This permit and authorization to operate shall expire at midnight

___________________________________________
Walter L. Baker, P.E.
Director

Applicable Norbest Operations Documents for this permit include but are not limited to:
  Sampling and Analysis Plan
  Anaerobic Lagoon Operations Manual
Part I

CONSTRUCTION PERMIT ISSUANCE

A. AUTHORIZED CONSTRUCTION

As part of this ground water discharge permit, a construction permit is hereby issued to Norbest Inc. as summarized below and detailed in Appendix A. Construction for this project will consist of a 15 million gallon anaerobic lagoon.

B. DESIGN AND CONSTRUCTION

Under authority of the Utah Water Quality Act, Section 19-5-108(1) Utah Coe Ann. 1953, as amended and Utah Administrative Code R317-1, the authorized facilities will be constructed in accordance with the engineering design plans and specifications attached as Appendix A.

Construction of anaerobic lagoon - The lagoon will be directly south of the Moroni City sanitary wastewater treatment plant. The lagoon will have an approximate footprint of 7 acres and have a minimum operating volume of 46 acre-feet (ac-ft).

Approved construction elements include:

- Construction of a 15 million gallon anaerobic wastewater treatment lagoon.
- The Lagoon will be lined with a Flexible Membrane Liner (FML)(40 mil HDPE) and a leak location test is required and part of the CQA/QC.

BAT Performance Monitoring - Best available technology monitoring will include minimum vertical freeboard.

- Minimum Vertical Freeboard – a minimum of 2 feet of vertical freeboard shall be maintained to ensure total containment.

Spill Containment - The permittee shall design, maintain and construct all pipelines and pumping facilities with a spill containment system that shall:

- Prevent any spills or leakage from any contact with the ground surface or ground water.

Any spill that does come into contact with the ground surface or ground water that causes pollution or has the potential to cause pollution to waters of the state shall be reported in accordance with Part III.I.
PART II  SPECIFIC CONDITIONS

A. GROUND WATER CLASSIFICATION
Results of the well sampling program indicate that ground water under the lagoon is likely Class I Drinking Water Quality Ground Water. This determination may be changed if subsequent compliance monitoring determines the ground water quality at the lagoon site.

B. BACKGROUND GROUND WATER QUALITY
Table 1 provides a range of background ground water quality data from Moroni City water supply wells #2 East Well and #3 West Well, and other nearby private wells.

C. GROUND WATER PROTECTION LEVELS
Table 2 provides interim ground water protection levels for compliance monitoring wells. Following an accelerated eight rounds of sampling, ground water protection levels will be established for the site utilizing the provisions outlined in UAC R317-6-4 for the parameters listed in Table 2. The interim protection levels of Table 2 will be modified if necessary. No degradation of ground water greater than existing levels found in monitoring well(s) upgradient of the lagoon will be allowed.

(a) Ground Water Quality Standard
D. **BEST AVAILABLE TECHNOLOGY (BAT) STANDARD**

The administration of this permit is founded on the use of Best Available Technology (BAT), in accordance with the requirements of UAC R317-6-1.3. The construction permit (PART V) issued with this discharge permit describes construction standards for wastewater treatment lagoons. Compliance with the requirements for use of BAT will be demonstrated by construction, operation and maintenance of the anaerobic lagoon according to the construction permit.

Achievement of these performance standards will be demonstrated by:

1) Only wastes from the plant operations may be disposed of in the lagoon.

2) No ground water degradation beyond permit limits established in Table 2 as measured by compliance monitoring wells.

3) Permitted Facilities. The facilities and equipment authorized under this permit are listed in Table 3.

E. **BEST MANAGEMENT PRACTICES**

1) The Permittee shall operate the facility such that the ground water quality standards (UAC R317-6-2) and ground water protection levels in Table 2 that were developed for this permit are not exceeded in the unconfined aquifer underlying the site, or other aquifers that may be impacted by facility operations. Utah ground water regulations also contain standards for contaminants such as metals, pesticides and volatile organic compounds. Accordingly, the Permittee must not discharge these or any other contaminants that could impair beneficial uses of the ground water.

3) Permittee shall operate the wastewater anaerobic lagoon according to the *Anaerobic Lagoon Operations Manual*. Implementation of the manual will ensure proper handling of plant wastewater, prompt cleanup of any releases, and an ongoing operation, inspection, and maintenance program for ancillary facilities associated with this permit.
F. **COMPLIANCE MONITORING REQUIREMENTS**

1. **General Provisions**

   a) *Future Modification of the Monitoring Program* - If at any time the Director determines the monitoring program to be inadequate, Permittee shall submit within 30 days of receipt of written notice from the Director a modified monitoring plan that addresses the inadequacies noted by the Director.

   b) *Compliance Monitoring Period* - Monitoring shall continue upon issuance of this permit and throughout the term of this permit. For facilities that are constructed during the term of this permit, monitoring shall commence upon initiation of operation of the new facility.

   c) *Laboratory Approval* - All water quality analyses shall be performed by a laboratory certified by the State of Utah to perform such analysis.

   d) *Water Level Measurement* - In association with each well sampling event, water level measurements shall be made in each monitoring well prior to removal of any water from the well casing. These measurements will be made from a surveyed permanent single reference point clearly marked on the top of the well or surface casing. Measurements will be made to the nearest 0.01 foot.

   e) *Sampling Protocol* - Water quality samples will be collected, handled and analyzed in conformance with the current approved version of the *Sampling and Analysis Plan*. The results of ground water monitoring shall be reported in accordance with the schedule in Part I Section H.

   f) **Ground Water Analyses** - The following analysis shall be performed on all water samples collected from **monitoring wells**:

      i) Field Measurements: pH, specific conductance, temperature

      ii) Laboratory Analysis:

         • Ammonia as nitrogen, bicarbonate, chloride, nitrate + nitrite as nitrogen, and sulfate.

         • Total Dissolved Solids (TDS)

   g) **Wastewater Analyses** - The following analyses shall be performed on a representative wastewater sample from the lagoon:

      i) Field Measurements: pH, specific conductance, temperature

      ii) Laboratory Analysis:

         • Total Kjeldahl Nitrogen (TKN), ammonia (NH3-N), nitrate-nitrite (Total) sulfate, chloride, Total Dissolved Solids (TDS), sodium, potassium, calcium, magnesium, bicarbonate, phosphorus (Total as P), and Oil & Grease (HEM).
h) Monitoring Frequency

After installation, any new compliance monitoring well that may be required by the Division of Water Quality will be sampled quarterly until a minimum of eight (8) events have been completed to establish baseline ground water quality. Sampling events will then change to a semi-annual compliance monitoring frequency.

The lagoon shall be sampled not less than annually. Sample collection, handling, and analysis shall be conducted in accordance with the most recently revised and approved version of the Sampling and Analysis Plan. Analyses for nitrogen species shall be conducted at the same laboratory. Results of the lagoon wastewater performance monitoring accompanied by any supporting raw data shall be submitted to the Division of Water Quality with the next Ground Water Quality Monitoring Report.

2. Damage to Monitoring Wells

If a monitoring well is damaged, is otherwise rendered inadequate for its intended purpose, or if a previous hydraulic gradient between two monitor wells is reversed, the Director shall be notified in writing within five days of the Permittee becoming aware of the condition.

3. BAT Leak Detection and Performance Monitoring Program

Permittee shall operate the anaerobic lagoon in accordance with the Best Management Practices specified in the Anaerobic Lagoon Operations Manual. Permittee shall conduct a lagoon inspection and maintenance program. Documentation of compliance with this program shall be maintained on site for review by representatives of the Division.

An electrically-based geophysical method will be periodically employed to determine if the synthetic liner of the anaerobic lagoon is free from defects or leakage. A leak detection survey shall be completed at the following frequency:

a) Upon completion of lagoon construction and prior to filling with wastewater.
b) Two times during the 5-year permit term: 2.5 years after permit issuance and 6 months prior to permit renewal.

G. NON-COMPLIANCE STATUS

1. Probable Out-of-Compliance Status - The permittee shall evaluate results of each ground water sampling event to determine any exceedence of the Ground Water Protection Levels found in Table 2 above. Upon determination that a Ground Water Protection Level has been exceeded in the ground water, the permittee shall:
2. Out-of-Compliance Status Based on Confirmed Exceedance of Permit Ground Water Protection Levels

a. Out of Compliance Status shall be defined as follows:

For parameters that have been defined as detectable in the background and for which protection levels have been established, out-of-compliance shall be defined as two consecutive samples exceeding the protection level and the mean background concentration by two standard deviations.

b. Notification and Accelerated Monitoring - upon determination by the permittee or the Director, in accordance with UAC R317-6-6.17, that an out-of-compliance status exists, the permittee shall:

1) Verbally notify the Director of the out-of-compliance status or acknowledge Director that such a status exists within 24 hours of receipt of data, and

2) Provide written notice within 5 days of the determination, and

3) Continue an accelerated schedule of monthly ground water monitoring for at least two months and continue monthly monitoring until the facility is brought into compliance as determined by the Director.

c. Source and Contamination Assessment Study Plan - within 30 days after the written notice to the Director required in Part I.G. 2.b.2, above, the permittee shall submit an assessment study plan and compliance schedule for:

1) Assessment of the source or cause of the contamination, and determination of steps necessary to correct the source.

2) Assessment of the extent of the ground water contamination and any potential dispersion.
3) Evaluation of potential remedial actions to restore and maintain ground water quality, and ensure that the ground water standards will not be exceeded at the compliance monitoring locations.

3. Out-of-Compliance Status Based Upon Failure To Maintain Best Available Technology - In the event that electrical leak detection surveys conducted for BAT monitoring indicates a violation of any of the construction or performance standards outlined in Part I.D and E of this permit, the permittee shall submit to the Director a notification and description of the violation in accordance with Part II.I of this permit.

H. REPORTING REQUIREMENTS

1. Water Monitoring - monitoring required in Part I.F above shall be reported according to the schedule in Table 4 below, unless modified by the Director:

<table>
<thead>
<tr>
<th>Monitoring Period</th>
<th>Report Due Date</th>
</tr>
</thead>
<tbody>
<tr>
<td>January through June</td>
<td>July 15</td>
</tr>
<tr>
<td>July thru December</td>
<td>January 15</td>
</tr>
</tbody>
</table>

2. Ground Water Quality Sampling - reporting will include:
   a. Field Data Sheets - or copies thereof, including the field measurements and other pertinent field data, such as: sampling location name/number, date and time, names of sampling crew, type of sampling: pump or grab, volume of water purged before sampling.
   b. Water Level Measurements - water level measurements from ground water monitoring wells will be reported as measured depth to ground water from the surveyed casing measuring point, and ground water elevations as converted by casing measuring point elevations.
   c. Laboratory Analytical Results - including date sampled, date received; and the results of analysis for each parameter, including: value or concentration, units of measurement, reporting limit (minimum detection limit for the examination), analytical method, and the date of the analysis.
   d. Results of leak detection surveys if any were conducted during the reporting period.

3. Electronic Filing Requirements - In addition to submittal of the hard copy data, above, the permittee will electronically submit the required ground water monitoring data in the electronic format specified by the Director. The data may be submitted by e-mail, PDF, compact disc, or other approved transmittal mechanism.

4. Monitoring Well As-Built Report - For each new well constructed the permittee shall submit diagrams and descriptions of the final completion of the monitoring wells. The report is due within 60 days of the date of well completion. The report shall include:
Part II
Permit No. UGW390005

a. Casing: depth, diameter, and type of material.
b. Screen: length, depth interval, diameter, material type, slot size.
c. Sand Pack: depth interval, material type and grain size.
d. Annular Seals: depth interval, material type.
e. Surface Casing and Cap: depth, diameter, material type, protection measures constructed.
f. Elevation and Location: ground surface elevation, elevation of water level measuring point, latitude and longitude in hours, minutes and seconds.
g. Well construction description, well completion description, results of well pump tests or slug tests.

I. COMPLIANCE SCHEDULE

1. Permit Compliance Schedule Item #1 (Sampling and Analysis Plan) Norbest shall submit for the Director’s approval a Sampling and Analysis Plan. The Plan shall incorporate the monitoring wells and anaerobic lagoon.

   The Plan shall be submitted within 90 days of the effective date of this permit.

2. Permit Compliance Schedule Item #2 (Anaerobic Lagoon Operations Manual) Norbest shall submit for the Director’s approval an updated Lagoon Operating Procedures Manual that meets the requirements of Part III (E) of this permit.

   The Plan shall be submitted within 90 days of the effective date of this permit.

3. Permit Compliance Schedule Item #3 Prior to placing the lagoon into service, Norbest shall install ground water monitoring wells completed in the shallow aquifer. One upgradient and a minimum of two downgradient wells will serve as one compliance mechanism for monitoring any lagoon discharge.

4. Permit Compliance Schedule Item #4 A site investigation and report that determines the extent of soil and ground water contamination resulting from WWTP equalization basin overflows. In accordance with R317-6-6.15D, the characterization of pollution should include the concentration, environmental fate and transport, and other significant characteristics of substances present, for both ground water contaminants and any contributing surficial contaminants. This report is due within ninety (90) days after issuance of UGW390005.

5. Final Closure Plan. In the event that the permittee decides to discontinue its operations at the facility the permittee shall notify the Director of such a decision and submit a Final Closure Plan. The Final Closure Plan shall be submitted no later than 180 days prior to the closure of the facility. The permittee shall resubmit Final Closure Plans within 60 days of receipt of written notice of deficiencies therein. Any material changes made to this plan shall require final approval of the Director.
PART III MONITORING, RECORDING AND REPORTING REQUIREMENTS

A. REPRESENTATIVE SAMPLING
Samples taken in compliance with the monitoring requirements established under Part I shall be representative of the monitored activity.

B. ANALYTICAL PROCEDURES
Water sample analysis must be conducted according to test procedures specified under UAC R317-6-6.3.L, unless other test procedures have been specified in this permit.

C. PENALTIES FOR TAMPERING
The Act provides that any person who falsifies, tampers with, or knowingly renders inaccurate, any monitoring device or method required to be maintained under this permit shall, upon conviction, be punished by a fine of not more than $10,000 per violation, or by imprisonment for not more than six months per violation, or by both.

D. REPORTING OF MONITORING RESULTS
Monitoring results obtained during each reporting period specified in the permit, shall be submitted to the Director, Utah Division of Water Quality at the following address no later than the 15th day of the month following the completed reporting period:

State of Utah
Division of Water Quality
P.O. Box 144870
Salt Lake City, Utah 84114-4870
Attention: Ground Water Protection Section

E. COMPLIANCE SCHEDULES
Reports of compliance or noncompliance with, or any progress reports on interim and final requirements contained in any Compliance Schedule of this permit shall be submitted no later than 14 days following each schedule date.

F. ADDITIONAL MONITORING BY THE PERMITTEE
If the permittee monitors any pollutant more frequently than required by this permit, using approved test procedures as specified in this permit, the results of this monitoring shall be included in the calculation and reporting of the data submitted. Such increased frequency shall also be indicated.

G. RECORDS CONTENTS
Records of monitoring information shall include:

1. The date, exact place, and time of sampling or measurements;
2. The individual(s) who performed the sampling or measurements;
3. The date(s) and time(s) analyses were performed;
4. The individual(s) who performed the analyses;
5. The analytical techniques or methods used; and,
6. The results of such analyses.
H. RETENTION OF RECORDS
The permittee shall retain records of all monitoring information, including all calibration and maintenance records and copies of all reports required by this permit, and records of all data used to complete the application for this permit, for a period of at least three years from the date of the sample, measurement, report or application. This period may be extended by request of the Director at any time.

I. TWENTY-FOUR HOUR NOTICE OF NONCOMPLIANCE REPORTING
1. The permittee shall verbally report any noncompliance which may endanger public health or the environment as soon as possible, but no later than 24 hours from the time the permittee first became aware of the circumstances. The report shall be made to the Utah Department of Environmental Quality 24 hour number, (801) 536-4123, or to the Division of Water Quality, Ground Water Protection Section at (801) 536-4300, during normal business hours (Monday through Friday 8:00 am - 5:00 pm Mountain Time).

2. A written submission shall also be provided to the Director within five days of the time that the permittee becomes aware of the circumstances. The written submission shall contain:
   a. A description of the noncompliance and its cause;
   b. The period of noncompliance, including exact dates and times;
   c. The estimated time noncompliance is expected to continue if it has not been corrected; and,
   d. Steps taken or planned to reduce, eliminate, and prevent reoccurrence of the noncompliance.

3. Reports shall be submitted to the addresses in Part II.D, Reporting of Monitoring Results.

J. OTHER NONCOMPLIANCE REPORTING
Instances of noncompliance not required to be reported within 24 hours, shall be reported at the time that monitoring reports for Part II.D are submitted.

K. INSPECTION AND ENTRY
The permittee shall allow the Director, or an authorized representative, upon the presentation of credentials and other documents as may be required by law, to:

1. Enter upon the permittee's premises where a regulated facility or activity is located or conducted, or where records must be kept under the conditions of the permit;

2. Have access to and copy, at reasonable times, any records that must be kept under the conditions of this permit;

3. Inspect at reasonable times any facilities, equipment (including monitoring and control equipment), practices, or operations regulated or required under this permit; and,

4. Sample or monitor at reasonable times, for the purpose of assuring permit compliance or as otherwise authorized by the Act, any substances or parameters at any location.
PART IV  COMPLIANCE RESPONSIBILITIES

A. DUTY TO COMPLY
The permittee must comply with all conditions of this permit. Any permit noncompliance constitutes a violation of the Act and is grounds for enforcement action; for permit termination, revocation and reissuance, or modification; or for denial of a permit renewal application. The permittee shall give advance notice to the Director of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

B. PENALTIES FOR VIOLATIONS OF PERMIT CONDITIONS
The Act provides that any person who violates a permit condition implementing provisions of the Act is subject to a civil penalty not to exceed $10,000 per day of such violation. Any person who willfully or negligently violates permit conditions is subject to a fine not exceeding $25,000 per day of violation. Any person convicted under Section 19-5-115(2) of the Act a second time shall be punished by a fine not exceeding $50,000 per day. Nothing in this permit shall be construed to relieve the permittee of the civil or criminal penalties for noncompliance.

C. NEED TO HALT OR REDUCE ACTIVITY NOT A DEFENSE
It shall not be a defense for a permittee in an enforcement action that it would have been necessary to halt or reduce the permitted activity in order to maintain compliance with the conditions of this permit.

D. DUTY TO MITIGATE
The permittee shall take all reasonable steps to minimize or prevent any discharge in violation of this permit which has a reasonable likelihood of adversely affecting human health or the environment.

E. PROPER OPERATION AND MAINTENANCE
The permittee shall at all times properly operate and maintain all facilities and systems of treatment and control (and related appurtenances) which are installed or used by the permittee to achieve compliance with the conditions of this permit. Proper operation and maintenance also includes adequate laboratory controls and quality assurance procedures. This provision requires the operation of back-up or auxiliary facilities or similar systems which are installed by a permittee only when the operation is necessary to achieve compliance with the conditions of the permit.
PART V  GENERAL REQUIREMENTS

A. PLANNED CHANGES
The permittee shall give notice to the Director as soon as possible of any planned physical alterations or additions to the permitted facility. Notice is required when the alteration or addition could significantly change the nature of the facility or increase the quantity of pollutants discharged.

B. ANTICIPATED NONCOMPLIANCE
The permittee shall give advance notice of any planned changes in the permitted facility or activity which may result in noncompliance with permit requirements.

C. PERMIT ACTIONS
This permit may be modified, revoked and reissued, or terminated for cause. The filing of a request by the permittee for a permit modification, revocation and reissuance, or termination, or a notification of planned changes or anticipated noncompliance, does not stay any permit condition.

D. DUTY TO REAPPLY
If the permittee wishes to continue an activity regulated by this permit after the expiration date of this permit, the permittee must apply for and obtain a permit renewal or extension. The application should be submitted at least 180 days before the expiration date of this permit.

E. DUTY TO PROVIDE INFORMATION
The permittee shall furnish to the Director, within a reasonable time, any information which the Director may request to determine whether cause exists for modifying, revoking and reissuing, or terminating this permit, or to determine compliance with this permit. The permittee shall also furnish to the Director, upon request, copies of records required to be kept by this permit.

F. OTHER INFORMATION
When the permittee becomes aware that it failed to submit any relevant facts in a permit application, or submitted incorrect information in a permit application or any report to the Director, it shall promptly submit such facts or information.

G. SIGNATORY REQUIREMENTS
All applications, reports or information submitted to the Director shall be signed and certified.

1. All permit applications shall be signed as follows:

   a. For a corporation: by a responsible corporate officer;

   b. For a partnership or sole proprietorship: by a general partner or the proprietor, respectively.

   c. For a municipality, State, Federal, or other public agency: by either a principal executive officer or ranking elected official.
Part V
Permit No. UGW390005

2. All reports required by the permit and other information requested by the Director shall be signed by a person described above or by a duly authorized representative of that person. A person is a duly authorized representative only if:

   a. The authorization is made in writing by a person described above and submitted to the Director, and,

   b. The authorization specified either an individual or a position having responsibility for the overall operation of the regulated facility or activity, such as the position of plant manager, operator of a well or a well field, superintendent, position of equivalent responsibility, or an individual or position having overall responsibility for environmental matters for the company. (A duly authorized representative may thus be either a named individual or any individual occupying a named position.)

3. Changes to Authorization. If an authorization under Part IV.G.2 is no longer accurate because a different individual or position has responsibility for the overall operation of the facility, a new authorization satisfying the requirements of Part IV.G.2 must be submitted to the Director prior to or together with any reports, information, or applications to be signed by an authorized representative.

4. Certification. Any person signing a document under this section shall make the following certification:

"I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations."

H. PENALTIES FOR FALSIFICATION OF REPORTS
The Act provides that any person who knowingly makes any false statement, representation, or certification in any record or other document submitted or required to be maintained under this permit, including monitoring reports or reports of compliance or noncompliance shall, upon conviction be punished by a fine of not more than $10,000 per violation, or by imprisonment for not more than six months per violation, or by both.

I. AVAILABILITY OF REPORTS
Except for data determined to be confidential by the permittee, all reports prepared in accordance with the terms of this permit shall be available for public inspection at the offices of the Director. As required by the Act, permit applications, permits, effluent data, and ground water quality data shall not be considered confidential.
Part V
Permit No. UGW390005

J. PROPERTY RIGHTS
The issuance of this permit does not convey any property rights of any sort, or any exclusive privileges, nor does it authorize any injury to private property or any invasion of personal rights, nor any infringement of federal, state or local laws or regulations.

K. SEVERABILITY
The provisions of this permit are severable, and if any provision of this permit, or the application of any provision of this permit to any circumstance, is held invalid, the application of such provision to other circumstances, and the remainder of this permit, shall not be affected thereby.

L. TRANSFERS
This permit may be automatically transferred to a new permittee if:

1. The current permittee notifies the Director at least 30 days in advance of the proposed transfer date;

2. The notice includes a written agreement between the existing and new permittee containing a specific date for transfer of permit responsibility, coverage, and liability between them; and,

3. The Director does not notify the existing permittee and the proposed new permittee of his or her intent to modify, or revoke and reissue the permit. If this notice is not received, the transfer is effective on the date specified in the agreement mentioned in paragraph 2 above.

M. STATE LAWS
Nothing in this permit shall be construed to preclude the institution of any legal action or relieve the permittee from any responsibilities, liabilities, penalties established pursuant to any applicable state law or regulation under authority preserved by Section 19-5-117 of the Act.

N. REOPENER PROVISION
This permit may be reopened and modified (following proper administrative procedures) to include the appropriate limitations and compliance schedule, if necessary, if one or more of the following events occurs:

1. If new ground water standards are adopted by the Board, the permit may be reopened and modified to extend the terms of the permit or to include pollutants covered by new standards. The permittee may apply for a variance under the conditions outlined in R317-6-6.4.D.

2. If alternative compliance mechanisms are required.

3. If subsequent ground water monitoring data reveals the background water quality values in Part I Table 1 are not accurate.
