BACKGROUND
Rubber Engineering facility is a molded rubber products manufacturer. The manufacturing plant processes about 4 million pounds of rubber products a year. The rubber may contain different additives to give different physical properties. The discharge from the factory consists of storm water and both contact water and non-contact cooling water. Contact water and non-contact cooling water are used to control temperature in the manufacturing of rubber parts.

PUBLIC COMMENTS
Public comments are invited any time prior to the deadline of the close of business on July 11, 2014. Written public comments can be submitted to: Matthew Garn, UPDES Engineering Section, Utah Division of Water Quality, P.O. Box 144870, Salt Lake City, Utah 84114-4870 or by email at: mgarn@utah.gov. After considering public comment the Division of Water Quality may execute the permit reissuance, revise it, or abandon it.
