## PREPARERS

This document was prepared by the following Division of Water Quality Staff:

Emilie Flemer, James Harris, Jodi Gardberg, Benjamin Holcomb, Jake Vander Laan, Lenora Sullivan, Calah Seese, Mark Stanger, Chris Bittner, Jeff Ostermiller, Suzan Tahir, Alexander Anderson, Marshall Baillie, Robert Bird, Benjamin Brown, Daniel English, Trisha Johnson, Brent Shaw, Carl Adams, Mike Allred, Jim Bowcutt, Amy Dickey, Scott Daly, Kari Lundeen, and Sandy Wingert.

## ACKNOWLEDGEMENTS

A special thank you is also extended to Walter Baker, Leah Ann Lamb, and Erica Gaddis for giving us the opportunity to rethink the way we assess and report on our waters. Karl Hermann, Julie Kinsey, Tina Laidlaw, and Sandra Spence (U.S. Environmental Protection Agency Region 8) were also instrumental in creating this report; they provided significant comments and advice on this document, which helped us ensure consistency between programs, assessment methods, and reporting tools.

Numerous agencies and entities have contributed to the data that went into the creation of this report. These include the Bureau of Land Management, U.S. Forest Service, National Park Service, Salt Lake County, Davis County, Bureau of Reclamation, Utah State University, Central Davis Sewer District, and other members of DWQ's Cooperative Monitoring Program. Special thanks go out to the staff at the United States Geological Survey and the Utah Division of Oil, Gas and Mining for providing additional data.

Numerous agencies and entities also contributed to the development of methods that went into the creation of this document. These include:

- Colorado's Department of Public Health and Environment Washington State Department of Ecology
- Idaho's Water Quality Division's Source Water Assessment Program
- Nevada's Bureau of Water Quality Planning in the Nevada Division of Environmental Protection
- New Mexico's Surface Water Quality Bureau in the New Mexico Environment Department
- Oregon's Department of Environmental Quality
- Pennsylvania's Department of Environmental Protection Bureau of Point and Non-point source Management
- Virginia's Department of Environmental Quality
- Wisconsin's Water Division as part of the Department of Natural Resources

The previously published work by these states allowed us to develop these draft assessment methods for high frequency data and helped us define credible data requirements specific to DWQ's High-Frequency Assessment program.

This 2016 Integrated Report was developed with funding provided by the U.S. Environmental Protection Agency's Clean Water Act, Sections 604(b), 106, and 319 grant funds.

## CONTENTS

**CHAPTER 1: INTRODUCTION**

**CHAPTER 2: 2016 303(D) ASSESSMENT METHODS**

**CHAPTER 3: RIVERS AND STREAM ASSESSMENTS**

**CHAPTER 4: LAKES AND RESERVOIR ASSESSMENTS**

**CHAPTER 5: NARRATIVE STANDARD ASSESSMENT OF RECREATIONAL USE SUPPORT IN LAKES AND RESERVOIRS AND APPLICATION TO UTAH LAKE**

**CHAPTER 6: EVALUATION OF HARMFUL ALGAL BLOOM DATA IN FARMINGTON BAY, GREAT SALT LAKE**

**CHAPTER 7: UTAH'S DRAFT ASSESSMENT METHODS FOR HIGH FREQUENCY DATA AND PILOT APPLICATION FOR THE JORDAN RIVER**

**2016 INTEGRATED REPORT RESPONSE TO PUBLIC COMMENTS**
