Additional guidance can be found in the following EPA Guidance Manuals:

PURPOSE

The purpose of the **Financial Management Program** is to ensure that adequate financial resources are available to support the Industrial Pretreatment Program.

PROGRAM

Personnel

The size of staff needed to manage the Industrial Pretreatment Program varies with several factors including size of the system, number of industrial users, number of permitted industrial users, number of industries sampled and whether they are sampled by POTW personnel or do their own sampling, and the number of Significant Industrial Users. This is more fully discussed in the **Other Considerations** section.

There should be one FTE (Full Time Equivalent) per 5 to 15 permits issued. Additional FTEs will be needed to assist with assessing user fees, unpermitted programs (such as FOG programs and mercury control programs) and non-residential customers. The industrial pretreatment staff salaries and expenses are part of the Budget and will be financed as described in the Cost Recovery System.

Brigham city anticipates an initial 0.6 FTE to implement the pretreatment program. Additional personnel time will be allocated if necessary. The following personnel will have the percentage of their time shown below allocated to pretreatment activities.

Raymond Poulson	10%
Rich Mickelsen	30%
Vic Jones	20%

Budget

At such time when the budget for the wastewater department is being prepared, the Pretreatment Coordinator should complete the *Program Budget* and submit it to the Public Works Director. Brigham City anticipates an initial allocation of \$40,000 including the personnel time allocations shown above to implement the program. Additional budget and resources will be assigned to the pretreatment program if necessary.

Cost Recovery System

It is the policy of Brigham City to assess all costs of the collection and treatment of wastewater to the users in an equitable way. This includes costs incurred by the Industrial Pretreatment Program. *Calculation of User Fees* presents a simplified approach to allocating the treatment costs among residential, commercial and industrial users.

User Fees

User fees are assessed to all users which discharge wastewater to the City's wastewater collection system. The fees are designed to cover the actual costs of maintaining and replacing both the collection and treatment systems. The sewer use charge system (UCS) is based on a minimum fixed charge for each residential user with a variable charge for

each commercial and industrial user based on the quantity or strength of individual wastewater generated.

Residential users are single family dwellings, or multiple family dwellings, where water is metered to each unit separately. An equivalent residential unit (ERU) is equal to the number of gallons of wastewater discharged monthly from one residential user. The flow of the wastewater is calculated using the winter water usage as defined by the average monthly water usage from the period of November through February of each year. The average use for these four months is used as the monthly average for the next twelve month period beginning in July. The quantity of water discharged from one residential user will average approximately [13,200] gallons/month.

Any user not classified as a residential user shall be classified as a commercial or industrial user and shall pay for their wastewater service based on usage of the system. The fees are calculated using a ratio of the commercial or industrial user's discharge strength and volume to one ERU strength and volume.

Any discharge of high strengths toxic wastes as defined in the Industrial Pretreatment Ordinance shall be assessed a user fee on a case-by-case basis.

User fees will be assessed for any wastewater discharge which needs to be pumped in order to reach the treatment system. The user fee imposed will cover actual maintenance, replacement, and electrical costs incurred by the City to accommodate the discharge.

Seasonal demands are defined as discharges from connections where the flow exceeds the yearly average by more than 25%. The user fee for seasonal demands shall be based on the capacity of the wastewater system which must be present year round in order to service the seasonal flow. The analysis and user fee determination for all seasonal dischargers will be determined on a case-by-case basis and shall be approved by the wastewater treatment manager.

Pretreatment Charges

Charges for the Industrial Pretreatment Program will be assessed to the individual users based on the actual costs of the following functions:

- Permitting
- Inspecting
- Sampling
- Analyzing sample (lab fee)
- Enforcing

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

Return to: Brigham City Corporation WWTP
P. O. Box 1005
20 North Main Street
Brigham City, UT 84302

Section A - General Information

A.1 Company Name, Mail Address, and Telephone Number (s):

Nucor - Vulcraft Group and Cold Finish Group

1875 W. Hwy 13

Brigham City, UT 84302

435-734-9433

A.2 Address of production or manufacturing facility. (If same as above, check here (X))

A.3 Name, title, and telephone number of person authorized to represent this firm in official dealings with the Sewer Authority and / or City:

Stan Walker, General Manager, 435-734-4401

A.4 Alternate person to contact concerning information provided herein:

Name Title Phone #

Aaron Bell, Environmental Coordinator, 435-734-4443

A.5 Identify the type of business conducted (auto repair, machine shop, electroplating, warehousing, painting, printing, meat packing, food processing, etc.)

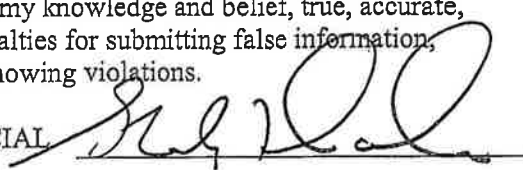

The sale, design, manufacture and shipment of open web steel joist and joist girders; and the sale, manufacture, and shipment of cold finish steel bars.

Note to Signing Official: In accordance with Title 40 of the Code of Federal Regulations Part 403 Section 403.14, information and frequency of data provided in this questionnaire which identifies the nature and frequency of discharge shall be available to the public without restriction. Requests for confidential treatment of other information shall be governed by procedures specified in 40 CFS Part 2. Should a discharge permit be required for your facility, the information in this questionnaire will be used to issue the permit. This is to be signed by an authorized official of your firm after adequate completion of this form and review of the information by the signing official.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and completed. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

DATE 7-21-10

SIGNATURE OF OFFICIAL

A.6 Provide a brief narrative description of the manufacturing, production, or service activities your firm conducts.

The joist operation cuts angled steel and plate to size, clamps and welds the steel joist, then Places a paint primer on the joist. Attaches wood to the top chord where applicable, stores the completed joist in the yard for shipment.

The cold finish operation processes shaped steel through a controlled and filtered shot blast operation, draws the steel through dyes, and coats cold drawn product with light film of rust preventive oil.

A.7 Standard Industrial Classification Number(s) (SIC Code) for your facilities:

3441

3316

A.8 This facility generates the following types of wastes (check all that apply)

Average Gallons Per Day

		Average Gallons per Day				
1.	<input checked="" type="checkbox"/> Domestic Waste (restrooms, employee showers, etc.)	<u>16,000</u>	<input checked="" type="checkbox"/>	Estimated	<input type="checkbox"/>	Measured
2.	<input type="checkbox"/> Cooling water, noncontact	<u> </u>	<input type="checkbox"/>	Estimated	<input type="checkbox"/>	Measured

Provide name and address of waste hauler(s), if used.

n/a

A.10 Is a Spill Prevention Control and Countermeasure Plan prepared for the facility?

Yes No

Note: If your facility did not check one or more of the items listed in A.8.4 through A.8.9 above, then you do not need to complete any further sections in this survey I application. If any items A.8.4 through A.8.9 were checked, complete the remainder of this survey I application.

SECTION B - FACILITY OPERATION CHARACTERISTICS

B. 1 Number of employee shifts worked per 24 hour day is 2
Average number of employees per shift is 250 / 110

B.2 Starting times of each shift: 1st 6:00 am 2nd 2:00 pm

Note: The following information in this section must be completed for each product line.

B.3 Principal product produced: Joist, girder and bridging manufacturing

B.4 Raw materials and process additives used: 90,000 tons of steel per year with no additives

B.5 Production process is: *

Batch Continuous Both % Batch _____ % Continuous _____
Average number of batches per 24 hour day

B.6 Hours of operation: 6:00 am to 10:00 pm continuous

B.7 Is production subject to seasonal variation? yes no
If yes, briefly describe seasonal production cycle.

B.8 Are there regular washdown, clean up and or maintenance periods? yes no
If yes, note when they occur.

We have a regularly schedule shutdown to perform preventive maintenance and special Projects. These are typically scheduled for the 1st week of July a last week in December. Although this may change depending on need and market circumstances. We do not perform any regular washdown activities.

B.9 Are any process changes or expansions planned during the next three years? yes no
If yes, briefly describe in terms of quantity and quality changes in wastewater generated.

B.3 Principal product produced: Cold Finish Steel process

B.4 Raw materials and process additives used: 34,000 tons of steel per year with no additives

B.5 Production process is: *

Batch Continuous Both % Batch _____ % Continuous _____
Average number of batches per 24 hour day

B.6 Hours of operation: ___5:00___ am to ___3:00___pm (x) continuous

B.7 Is production subject to seasonal variation? () yes (x) no
If yes, briefly describe seasonal production cycle.

B.8 Are there regular washdown, clean up and or maintenance periods? () yes () no
If yes, note when they occur.

We have a regularly schedule shutdown to perform preventive maintenance and special Projects. These are typically scheduled for the 1st week of July a last week in December. Although this may change depending on need and market circumstances. We do not perform any regular washdown activities.

B.9 Are any process changes or expansions planned during the next three years? () yes (x) no
If yes, briefly describe in terms of quantity and quality changes in wastewater generated.

SECTION C - WASTEWATER INFORMATION

C. 1 If your facility employs processes in any of the 37 industrial categories or business activities listed below and any of these processes generate wastewater or waste sludge, place a check beside the category or business activity (check all that apply).

A. 37 Industrial Categories

1. () Adhesives and Sealants
2. () Aluminum Forming
3. () Auto and Other Laundries
4. () Battery Manufacturing
5. () Coal Mining
6. () Coil Coating
7. () Copper Forming
8. () Electric and Electronic Components
9. () Electroplating
10. () Explosives Manufacturing
11. () Gum and Wood Products
12. () Ink Formulation
13. () Inorganic Chemicals
14. (x) Iron and Steel
15. () Leather Tanning and Finishing
16. () Mechanical Products
17. () Metal Finishing
18. () Metal Molding and Casting (Foundries)
19. () Nonferrous Metals
20. () Nonferrous Metals Forming
21. () Ore Mining
22. () Organic Chemicals
23. () Paint Formulation
24. () Pesticides
25. () Petroleum Refining
26. () Pharmaceutical Products

- 27. Pictographic Supplies
- 28. Plastics Processing
- 29. Plastic and Synthetic Manufacturing
- 30. Porcelain Enameling
- 31. Printing and Publishing
- 32. Pulp and Paper
- 33. Rubber Processing
- 34. Soap and Detergent Manufacturing
- 35. Steam Electric Power
- 36. Textile Mills
- 37. Timber Products

B. Other Business Activity

- Dairy Products
- Slaughter / Meat Packing / Rendering
- Food / Edible Products Processor
- Beverage Bottler

C.2 Pretreatment devices or processes used for treating wastewater or sludge.

(Check as many as appropriate)

- Air Flotation
- Centrifuge
- Chemical Precipitation
- Chlorination
- Cyclone
- Filtration
- Flow Equalization
- Grease or Oil Separation, Type
- Grit Removal
- Ion Exchange
- Neutralization, PI-I Correction
- Ozonation
- Reverse Osmosis
- Screen
- Sedimentation
- Septic Tank
- Solvent Separation
- Spill Protection
- Sump
- Biological Treatment, Type
- Rainwater Diversion or Storage
- Other Chemical Treatment, Type
- Other Physical Treatment Type
- Other, Type
- No Pretreatment Provided

C.3 If any wastewater analyses have been performed on the wastewater discharge(s) from your facilities, attach a copy of the most recent data to this questionnaire. Be sure to include the date of the analysis, name of laboratory performing the analysis, and location(s) from which sample(s) were taken (attach sketches, plan, etc., as necessary).

SECTION D - OTHER WASTES

D. 1 Are any liquid wastes or sludge from this firm disposed of by means other than discharge to the sewer system? (X) yes () no

If "no", skip remainder of Section D.

If "yes", complete items 2 and 3.

D.2 These wastes may best be described as:

	Estimated Gallons or Pounds Per Year
<input type="checkbox"/> Acids and Alkalies	_____
<input type="checkbox"/> Heavy Metal Sludges	_____
<input type="checkbox"/> Inks and or Dyes	_____
<input checked="" type="checkbox"/> Oil and or Grease	1000 gallons/yr
<input type="checkbox"/> Organic Compounds	_____
<input checked="" type="checkbox"/> Paints	4400 gallons/yr
<input type="checkbox"/> Pesticides	_____
<input type="checkbox"/> Plating Wastes	_____
<input type="checkbox"/> Pretreatment Sludges	_____
<input checked="" type="checkbox"/> Solvents and or Thinners	Part of the 4400 gallons shipped as paint waste
<input type="checkbox"/> Other Hazardous Waste (specify)	_____
<input type="checkbox"/> Other Wastes (specify)	_____

D.3 For the above checked wastes, does your company practice:

On - Site Storage

Off - Site Storage

On - Site Disposal

Off - Site Disposal

Briefly describe the method(s) of storage or disposal checked above.

Wastes are generally stored on-site in drums or tanks.

Disposal off-site is via recyclers, or reclamation facilities.

I have personally examined and am familiar with the information submitted in this document and attachments. Based on my inquiry of those individuals immediately responsible for obtaining the information reported herein, I believe that the submitted information is true, accurate and complete. I am aware that there are significant penalties for submitting false information, including the possibility of fine and/or imprisonment.

DATE _____ SIGNATURE OF OFFICIAL _____

Comments: Please contact Aaron Bell (435) 734-4443 if you have any questions need more information regarding this survey. We have attached an analytical fro the Bridging Line process Water, if other analytical are needed please contact us.

SECTION B – FACILITY OPERATION CHARACTERISTICS

B.1 Number of employee shifts worked per 24 hour day is: 2

Average number of employees per shift is: (1st) 173; (2nd) 28

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

B.2 Starting times of each shift:

1st 6:00 A.M. am pm

2nd _____ am pm

3rd 10:00 P.M. am pm

Note: The following information in this section must be completed for each product line.

B.3 Principal Product produced:

Metal Building components

B.4 Raw materials and process additives used:

9296 tons of steel

B.5 Production process is:

Batch % Batch _____

Continuous % Continuous _____

Both

Average number of batches per 24 hour day _____

B.6 Hours of operation: _____ am to _____ pm continuous

B.7 Is production subject to seasonal variation? Yes No

If yes, briefly describe seasonal production cycle.

Note for B.5: Production consists of the fabrication of many pieces of welded structural and roll formed steel. Neither term accurately describes this process.

B.8 Are there regular wash down, clean up and or maintenance periods? Yes No

If yes, note when they occur 1 week in December

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

B.9 Are any process changes or expansions planned during the next three years?

Yes No

If yes, briefly describe in terms of quantity and quality changes in wastewater generated.

SECTION C – WASTEWATER INFORMATION

C.1 If your facility employs process in any of the 37 industrial categories or business activities listed below and any of these processes generate wastewater or waste sludge, place a check beside the category or business activity (check all that apply).

A. 37 Industrial Categories

1. Adhesives and Sealants
2. Aluminum Forming
3. Auto and Other Laundries
4. Battery Manufacturing
5. Coal Mining
6. Coil Coating
7. Copper Forming
8. Electric and Electronic Components
9. Electroplating
10. Explosives Manufacturing
11. Gum and Wood Products
12. Ink Formulation
13. Inorganic Chemicals
14. Iron and Steel

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

- 15. Leather Tanning and Finishing
- 16. Mechanical Products
- 17. Metal Finishing
- 18. Metal Molding and Casting (Foundries)
- 19. Nonferrous Metals
- 20. Nonferrous Metals Forming
- 21. Ore Mining
- 22. Organic Chemicals
- 23. Paint Formulation
- 24. Pesticides
- 25. Petroleum Refining
- 26. Pharmaceutical Products
- 27. Photographic Supplies
- 28. Plastic Processing
- 29. Plastic and Synthetic Manufacturing
- 30. Porcelain Enameling
- 31. Printing and Publishing
- 32. Pulp and Paper
- 33. Rubber Processing
- 34. Soap and Detergent Manufacturing
- 35. Steam Electric Power
- 36. Textile Mills
- 37. Timber Products

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

B. Other Business Activity

- Dairy Products
- Slaughter / Meat Packing / Rendering
- Food / Edible Products Processor
- Beverage Bottler

C.2 Pretreatment devices or processes used for treating wastewater or sludge. (Check as many as appropriate)

- Air Flotation
- Centrifuge
- Chemical Precipitation
- Chlorination
- Cyclone
- Filtration
- Flow Equalization
- Grease or Oil Separation, Type Oil/Water Separator
- Grit Removal
- Ion Exchange
- Neutralization, pH Correction
- Ozonation
- Reverse Osmosis
- Screen
- Sedimentation
- Septic Tank
- Solvent Separation

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

- Spill Protection
- Sump
- Biological Treatment, Type _____
- Rainwater Diversion or Storage Storm Water Retention Ponds
- Other Chemical Treatment, Type _____
- Other Physical Treatment Type _____
- Other, Type _____
- No Pretreatment Provided

C.3 If any wastewater analyses have been performed on the wastewater discharge(s) from your facilities, attaché a copy of the most recent data to this questionnaire. Be sure to include the date of the analysis, name of laboratory performing the analysis, and location(s) from which sample(s) were taken (attach sketches, plan, etc., as necessary).

SECTION D – OTHER WASTES

D.1 Are any liquid wastes or sludge from this firm disposed of by means other than discharge to the sewer system? Yes No

If "no", skip remainder of Section D.

If "yes", complete items D.2 and D.3.

D.2 These wastes may best be described as:

	Estimated Gallons or Pounds Per Year
<input type="checkbox"/> Acids and Alkalies	_____
<input type="checkbox"/> Heavy Metal Sludge's	_____
<input type="checkbox"/> Inks and or Dyes	_____
<input type="checkbox"/> Oil and or Grease	400 Gallons
<input type="checkbox"/> Organic Compounds	_____
<input type="checkbox"/> Paints	1200 Gallons

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

- Pesticides _____
- Plating Wastes _____
- Pretreatment Sludge's _____
- Solvents and or Thinners _____
- Other Hazardous Waste (specify) _____
- Other Wastes (specify) Used Lamps, Batteries, and lamp ballasts

D.3 For the above checked wastes does your company practice:

- On – Site Storage
- Off – Site Storage
- On – Site Disposal
- Off – Site Disposal

Briefly describe the method(s) of storage or disposal checked above.

Wastes are generally stored on-site in drums and totes. Disposal is off-site using authorized recycling agents.

I have personally examined and am familiar with the information submitted in this document and attachments. Based on my inquiry of those individuals immediately responsible for obtaining the information reported herein, I believe that the submitted information is true, accurate and complete.

BRIGHAM CITY CORPORATION
WASTEWATER SURVEY FOR NONRESIDENTIAL ESTABLISHMENTS

Return to: Brigham City Corporation WWTP
P. O. Box 1005
20 North Main Street
Brigham City, UT 84302

Section A - General Information

A.1 Company Name, Mail Address, and Telephone Number (s):

ANTOLIV Brigham Facility, 250 American Way
Brigham City, UTAH 84339

A.2 Address of production or manufacturing facility. (If same as above, check here)

A.3 Name, title, and telephone number of person authorized to represent this firm in official dealings with the Sewer Authority and / or City:

Kent Parkinson, EH & S Supervisor, 435-734-6213

A.4 Alternate person to contact concerning information provided herein:

Name Brian Theuren Title HR Manager Phone # 435-734-6070

A.5 Identify the type of business conducted (auto repair, machine shop, electroplating, warehousing, painting, printing, meat packing, food processing, etc.)

Automotive Safety Products manufacturer

Note to Signing Official: In accordance with Title 40 of the Code of Federal Regulations Part 403 Section 403.14, information and frequency of data provided in this questionnaire which identifies the nature and frequency of discharge shall be available to the public without restriction. Requests for confidential treatment of other information shall be governed by procedures specified in 40 CFS Part 2. Should a discharge permit be required for your facility, the information in this questionnaire will be used to issue the permit.

This is to be signed by an authorized official of your firm after adequate completion of this form and review of the information by the signing official.

I certify under penalty of law that this document and all attachments were prepared under my direction or supervision in accordance with a system designed to assure that qualified personnel properly gather and evaluate the information submitted. Based on my inquiry of the person or persons who manage the system, or those persons directly responsible for gathering the information, the information submitted is, to the best of my knowledge and belief, true, accurate, and completed. I am aware that there are significant penalties for submitting false information, including the possibility of fine and imprisonment for knowing violations.

DATE 6/07/2011 SIGNATURE OF OFFICIAL Kent Parkinson

A.6 Provide a brief narrative description of the manufacturing, production, or service activities your firm conducts.

ASSEMBLIES Automotive Safety Airbag INFLATORS

A.7 Standard Industrial Classification Number(s) (SIC Code) for your facilities:

3714

A.8 This facility generates the following types of wastes (check all that apply)

	Average Gallons Per Day	
1. <input checked="" type="checkbox"/> Domestic waste (restrooms, employee showers, etc.)	<u>5000</u>	<input checked="" type="checkbox"/> estimated () measured
2. () Cooling water, noncontact	_____	() estimated () measured
3. <input checked="" type="checkbox"/> Boiler/Tower blowdown	<u>10,000</u>	<input checked="" type="checkbox"/> estimated () measured
4. () Cooling water, contact	_____	() estimated () measured
5. <input checked="" type="checkbox"/> Process	<u>3,000</u>	<input checked="" type="checkbox"/> estimated () measured
6. <input checked="" type="checkbox"/> Equipment/Facility wash down	<u>50</u>	<input checked="" type="checkbox"/> estimated () measured
7. () Air Pollution Control Unit	_____	() estimated () measured
8. () Storm water runoff to sewer	_____	() estimated () measured
9. () Other	_____	() estimated () measured
Total A. 8.1 - 8.9 =		<u>18050</u>

A.9 Wastes are discharged to (check all that apply):

	Average Gallons Per Day	
<input checked="" type="checkbox"/> Sanitary Sewer	<u>18,050</u>	<input checked="" type="checkbox"/> estimated () measured
() Storm Sewer	_____	() estimated () measured
() Surface Water	_____	() estimated () measured
() Ground Water	_____	() estimated () measured
() Evaporation	_____	() estimated () measured
() Other (describe)	_____	() estimated () measured

Provide name and address of waste hauler(s), if used.

A.10 Is a Spill Prevention Control and Countermeasure Plan prepared for the facility?

Yes () No

Note: If your facility did not check one or more of the items listed in A.8.4 through A.8.9 above, then you do not need to complete any further sections in this survey / application. If any items A.8.4 through A.8.9 were checked, complete the remainder of this survey / application.

SECTION B - FACILITY OPERATION CHARACTERISTICS

B.1 Number of employee shifts worked per 24 hour day is 3.

Average number of employees per shift is 300.

B.2 Starting times of each shift: 1st. 6:00 am 2nd. 2:00 pm 3rd. 10:00 pm

Note: The following information in this section must be completed for each product line.

B.3 Principal product produced: AIR BAG INFLATORS

B.4 Raw materials and process additives used: GAS GENERANT, metal components
Electrical parts, Fractating devices
Washing Solvents.

B.5 Production process is:

() Batch (Continuous) () Both _____% Batch _____% Continuous

Average number of batches per 24 hour day _____.

B.6 Hours of operation: _____ am to _____ pm (continuous)

B.7 Is production subject to seasonal variation? () yes (no)

If yes, briefly describe seasonal production cycle.

B.8 Are there regular washdown, clean up and or maintenance periods? () yes (no)

If yes, note when they occur.

B.9 Are any process changes or expansions planned during the next three years? () yes (no)

If yes, briefly describe in terms of quantity and quality changes in wastewater generated.

SECTION C - WASTEWATER INFORMATION

C.1 If your facility employs process in any of the 37 industrial categories or business activities listed below and any of these processes generate wastewater or waste sludge, place a check beside the category or business activity (check all that apply).

Provide name and address of waste hauler(s), if used.

A.10 Is a Spill Prevention Control and Countermeasure Plan prepared for the facility?

Yes () No

Note: If your facility did not check one or more of the items listed in A.8.4 through A.8.9 above, then you do not need to complete any further sections in this survey / application. If any items A.8.4 through A.8.9 were checked, complete the remainder of this survey / application.

SECTION B - FACILITY OPERATION CHARACTERISTICS

B.1 Number of employee shifts worked per 24 hour day is 3.

Average number of employees per shift is TBD.

B.2 Starting times of each shift: 1st. 6 am pm 2nd. 2 am pm 3rd. 10 am pm

EXACT SHIFT TIMES MAY SHIFT TO MEET BUSINESS NEEDS
Note: The following information in this section must be completed for each product line.

B.3 Principal product produced: CONSUMER PAPER PRODUCTS

B.4 Raw materials and process additives used: PULP / WATER

B.5 Production process is:

Batch Continuous Both _____% Batch _____% Continuous

Average number of batches per 24 hour day _____.

B.6 Hours of operation: 6 am to 6 pm continuous - DURING START-UP & CONTINUOUS,

B.7 Is production subject to seasonal variation? yes no THEREAFTER

If yes, briefly describe seasonal production cycle.

B.8 Are there regular washdown, clean up and or maintenance periods? yes no

If yes, note when they occur. PER PLANNED MAINTENANCE SCHEDULE

B.9 Are any process changes or expansions planned during the next three years? yes no

If yes, briefly describe in terms of quantity and quality changes in wastewater generated.

SECTION C - WASTEWATER INFORMATION

C.1 If your facility employs process in any of the 37 industrial categories or business activities listed below and any of these processes generate wastewater or waste sludge, place a check beside the category or business activity (check all that apply).

A. 37 Industrial Categories

1. Adhesives and Sealants
2. Aluminum Forming
3. Auto and Other Laundries
4. Battery Manufacturing
5. Coal Mining
6. Coil Coating
7. Copper Forming
8. Electric and Electronic Components
9. Electroplating
10. Explosives Manufacturing
11. Gum and Wood Products
12. Ink Formulation
13. Inorganic Chemicals
14. Iron and Steel
15. Leather Tanning and Finishing
16. Mechanical Products
17. Metal Finishing

- 18. () Metal Molding and Casting (Foundries)
- 19. () Nonferrous Metals
- 20. () Nonferrous Metals Forming
- 21. () Ore Mining
- 22. () Organic Chemicals
- 23. () Paint Formulation
- 24. () Pesticides
- 25. () Petroleum Refining
- 26. () Pharmaceutical Products
- 27. () Photographic Supplies
- 28. () Plastics Processing
- 29. () Plastic and Synthetic Manufacturing
- 30. () Porcelain Enameling
- 31. () Printing and Publishing
- 32. (x) Pulp and Paper
- 33. () Rubber Processing
- 34. () Soap and Detergent Manufacturing
- 35. () Steam Electric Power
- 36. () Textile Mills
- 37. () Timber Products

B. Other Business Activity

- () Dairy Products
- () Slaughter / Meat Packing / Rendering
- () Food / Edible Products Processor
- () Beverage Bottler

C.2 Pretreatment devices or processes used for treating wastewater or sludge.
(Check as many as appropriate)

- (x) Air Flotation
- () Centrifuge
- () Chemical Precipitation
- () Chlorination
- () Cyclone
- () Filtration
- () Flow Equalization
- (x) Grease or Oil Separation, Type GRAVITY
- () Grit Removal
- () Ion Exchange
- () Neutralization, PH Correction
- () Ozonation
- () Reverse Osmosis
- () Screen

- Sedimentation
- Septic Tank
- Solvent Separation
- Spill Protection
- Sump
- Biological Treatment, Type _____
- Rainwater Diversion or Storage _____
- Other Chemical Treatment, Type _____
- Other Physical Treatment Type _____
- Other, Type _____
- No Pretreatment Provided

C.3 If any wastewater analyses have been performed on the wastewater discharge(s) from your facilities, attach a copy of the most recent data to this questionnaire. Be sure to include the date of the analysis, name of laboratory performing the analysis, and location(s) from which sample(s) were taken (attach sketches, plan, etc., as necessary).

SECTION D - OTHER WASTES

D.1 Are any liquid wastes or sludge from this firm disposed of by means other than discharge to the sewer system? yes no
 If "no", skip remainder of Section D.
 If "yes", complete items 2 and 3.

D.2 These wastes may best be described as:

	Estimated Gallons or Pounds Per Year
<input type="checkbox"/> Acids and Alkalies	_____
<input type="checkbox"/> Heavy Metal Sludges	_____
<input checked="" type="checkbox"/> Inks and or Dyes	TBD - TO BE RECYCLED
<input checked="" type="checkbox"/> Oil and or Grease	TBD - TO BE RECYCLED
<input type="checkbox"/> Organic Compounds	_____
<input type="checkbox"/> Paints	_____
<input type="checkbox"/> Pesticides	_____
<input type="checkbox"/> Plating Wastes	_____
<input type="checkbox"/> Pretreatment Sludges	_____
<input type="checkbox"/> Solvents and or Thinners	_____
<input checked="" type="checkbox"/> Other Hazardous Waste (specify)	_____
D001, D002, D003 F, P, D & K RCRA LISTED WASTES	TBD - SENT OFF-SITE FOR DISPOSAL / RECYCLING
<input type="checkbox"/> Other Wastes (specify)	_____
_____	_____
_____	_____
_____	_____

**Brigham City
Pretreatment Program
Section 7**

Other Considerations

The following information can be found in this section:

**Purpose
Legal Authority
Program**

**POTW Design Information
Sludge Management
Multijurisdictional Situations
Brigham City Organization
Pretreatment Equipment**

Pretreatment Equipment

FLOW CHARTS

None

FORMS

None

Additional guidance can be found in the following EPA Guidance Manuals:

- **POTW Pretreatment Program Development**

PURPOSE

The purpose of this section is to provide the Pretreatment Coordinator with a specific source of needed information in order to aid in the management of the City's pretreatment program.

LEGAL AUTHORITY

United States Code of Federal Regulations 40 CFR 403 and 503.

Brigham City Pretreatment Standards, Various Sections.

PROGRAM

POTW Design Information

This section includes specific information on the design/rated capacity of the Brigham City POTW. Recommended for inclusion are:

1. Design Report Summary Information
2. POTW Design Basis
3. POTW Organic, Hydraulic and TSS Capacity
4. Unit Process Capacities
5. POTW Stress Test Results
6. POTW Flow Diagrams

Sludge Management

Brigham City must evaluate the need to technically evaluate the need to develop local discharge limits for protection of many treatment operations including the beneficial reuse of the POTW sludge. This section should contain a brief overview of the current and any proposed sludge disposal practices employed by the City. Sludge management practices should be in accordance with 40 CFR Part 503 and the POTW's sludge permit. For beneficial reuse of sludge, all efforts should be employed to comply with Table III values for pollutant concentrations. The Region VIII biosolids manual should be used in conjunction with this section.

Multijurisdictional Situations

If the City services several cities or counties or users outside its jurisdiction, it will need to obtain an agreement with each political subdivision that it services. This agreement will call for the implementation of the pretreatment program within the political subdivision by an exact or similar ordinance. In addition, the following items should be addressed in the agreement:

1. Who is to identify industrial users?
2. Who will issue permits?

3. Who will provide inspection and sampling in accordance with the program requirements?
4. Who will review all reports submitted?
5. Who will notify IU's of violations and take appropriate enforcement action as required in accordance with the Enforcement Response Plan.

The agreement should allow the City to take over enforcement action against any IU should the contributing jurisdiction fail to do so in an effective and timely manner.

In accordance with section 5.8 of the Pretreatment Standards, the City may also issue a permit to the contributing jurisdiction requiring it to comply with all requirements of the pretreatment program directly.

Brigham City Organization

The City should include in this section a copy of its organization chart with specific reference as to how pretreatment fits into the organization. The organization chart should specify the responsibilities for each position associated with pretreatment and include a job description. Pretreatment tasks which should be assigned to specific positions and included in the position descriptions are as follows:

- | | |
|--|--------------------------|
| 1. Development and Maintenance of Industrial User Survey | Pretreatment Coordinator |
| 2. Technical Review of IU Applications | Pretreatment Coordinator |
| 3. Site Inspection of IU Facilities | Pretreatment Coordinator |
| 4. Permit Preparation | Pretreatment Coordinator |
| 5. Permit Review | Superintendent |
| 6. Issuance of Permit and Signature Authority | Pretreatment Coordinator |
| 5. Inspections | Pretreatment Coordinator |
| 6. Sampling/Chain of Custody | Pretreatment Coordinator |
| 7. Laboratory Analysis | Contract lab |
| 8. Legal Assistance and Advice | City Attorney |
| 9. Clerical Duties | Pretreatment Coordinator |
| 10. Enforcement Responsibilities | Pretreatment Coordinator |
| 11. Overall Program Management/Administration | Pretreatment Coordinator |

In general there should be one FTE per 5 to 15 permits issued. Additional FTEs will be needed to assist with assessing user fees, unpermitted programs (such as FOG programs and mercury control programs) and non-residential customers. This section should be used in conjunction with Section 5 of the Manual which deals with financing of the pretreatment program.

Brigham City anticipates having the following personnel allocated to the pretreatment program.

Raymond Poulson	10%
Rich Mickelsen	30%
Vic Jones	20%

Pretreatment Program Equipment

Some or all of the following recommended equipment should be available for implementation of the pretreatment program.

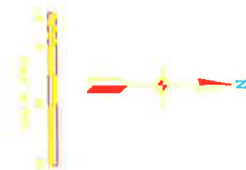

Sampling Equipment

1. Sampling Van or Truck with appropriate equipment
2. Automatic Composite Samplers
3. Flow Meters
4. Gas Detectors for Confined Space Access
5. Confined Space Safety Equipment
6. Self Contained Breathing Apparatus
7. Manhole Access Tripod
8. Safety Equipment and Protective Clothing

Analytical Equipment

1. Portable pH Meters
2. Portable Oxygen Meters
3. Conventional Pollutant Analysis Equipment
4. Gas Chromatograph
5. GC/MS
6. Atomic Adsorption Spectrophotometer

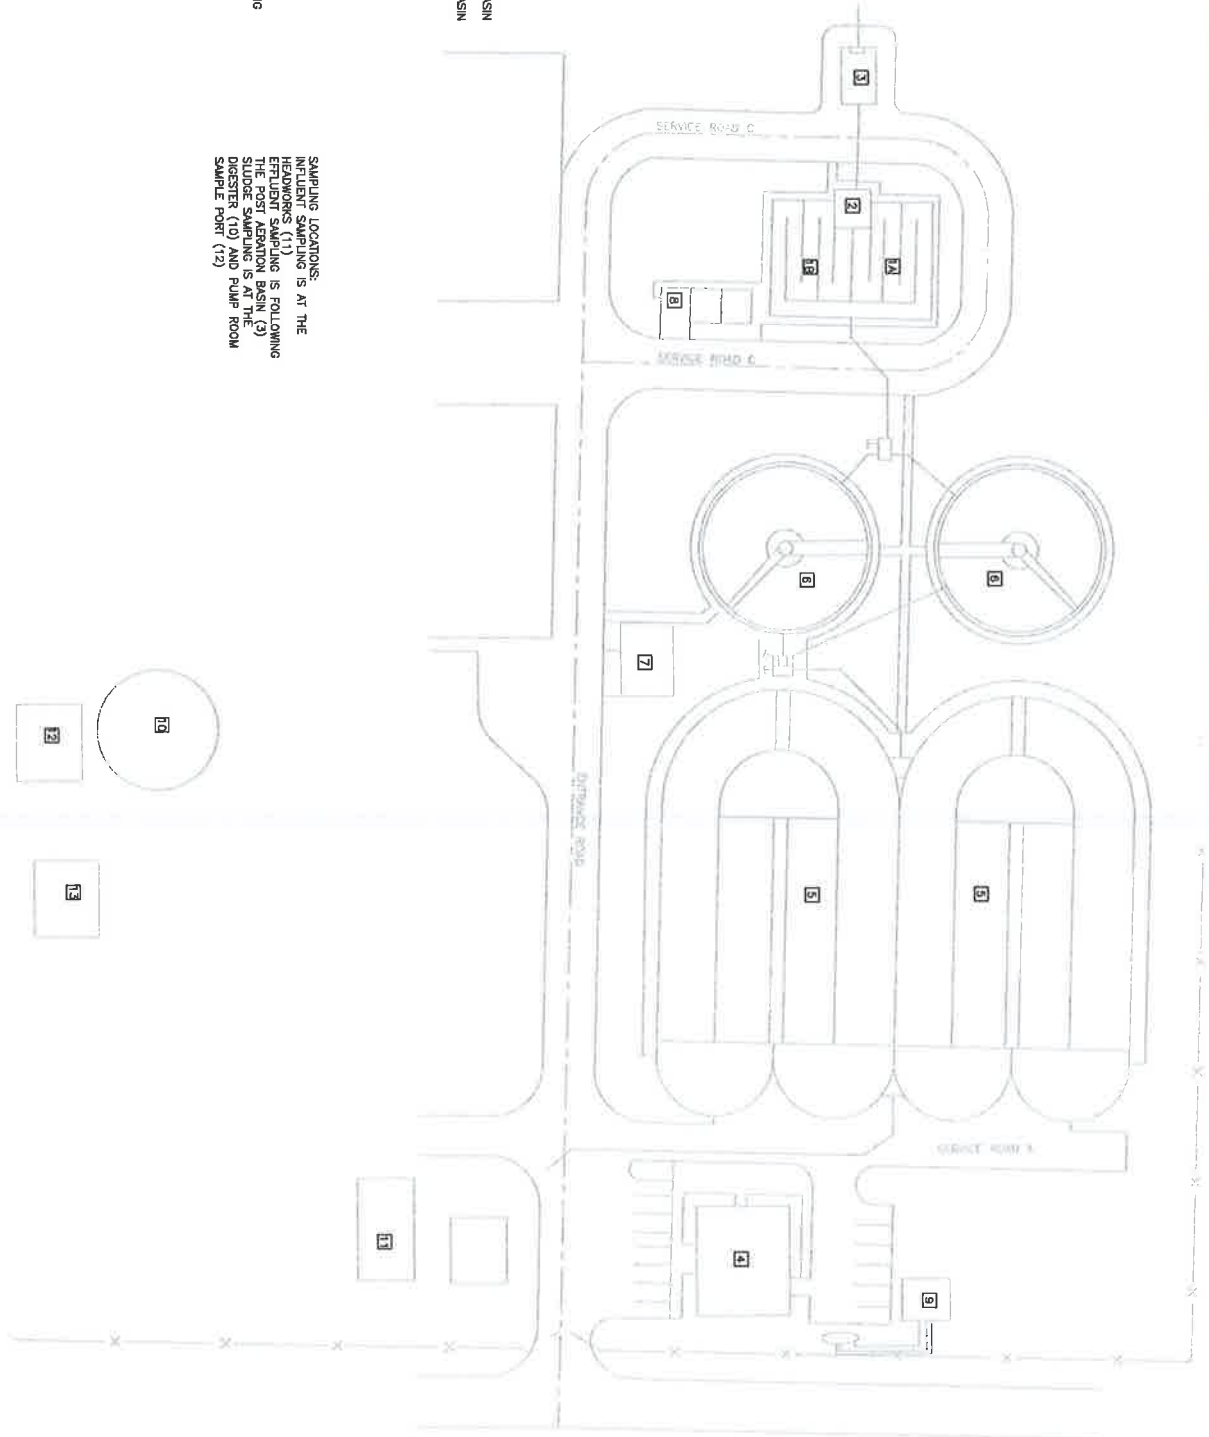

It should be noted that some of the analytical equipment may be located at City in-house laboratory or at a contract laboratory.

LIST OF EQUIPMENT AVAILABLE TO THE BRIGHAM CITY PRETREATMENT PROGRAM

Type of Instrument, i.e. GC, GC/MS	BCE Instrument ID #	Manufacturer	Model #	Options, i.e. detectors, etc.	Methods Performed
Balance	129	Mettler	AX 205	RS232 Connection	2540D
DO Meter	141	YSI	5100	RS232 Connection	5210B, 4500 (O)
pH Meter	150	Thermo Orion	720 A+	Temperature Compensating	4500 (H+)B, 4500 (NH3)D
Incubator	1	REVCO	50A14	N/A	5210B
Incubator	4	Fisher	Model 146	N/A	9215B, 9223B
Spectro Photometer	10	Hach	DR4000	N/A	4500 (Cl)G
Fluoride Meter	162	Thermo Orion	720 A+	RS232 Connection	4500 (F-)C
Quanti-Tray Sealer	93	Idexx	Model 2X	N/A	9223B
Balance	187	Mettler	PB3002-S	600g/3100g	9215B

In addition to this laboratory equipment, the pretreatment will have the use of the resources of the City POTW including vehicles, gas detectors, and other safety equipment such as PPE. Arrangements will be made with permitted users to install automatic samplers and flow monitors when necessary. If the locations to be monitored include hazardous conditions such as chlorine use, self contained breathing apparatus will be available on-site. The Waste Treatment Manager has access to this equipment and other resources of the Public Works Department as necessary to implement and execute the pretreatment program. The City also has a contract with and utilizes the services of a certified laboratory to analyze water samples for pollutant concentrations. The pretreatment program will use this laboratory contract to obtain necessary analyses.

ATTORNEY'S STATEMENT

I am the attorney for Brigham City and the following statement is submitted pursuant to the requirements contained in 40CFR 403.9(b)(1) regarding the legal authority for Brigham City to implement its pretreatment program.

It is my opinion that Brigham City has adequate authority to carry out the program described in 40CFR 403.8 based upon the authority granted to Brigham City pursuant to the provisions of Title 19 Chapter 5 and Title 10 Chapter 8 of the Utah Code Annotated, 1953, as amended and as implemented by Brigham City Wastewater/Pretreatment Ordinance, together with related Ordinances adopted by Box Elder County.

The following references to the legal authority requirements of 40CFR 403.8(f)(1) and (2) are correlated with the appropriate sections of Brigham City's Industrial Pretreatment Standards and Permitting Program:

403.8(f)(1)(i)

A permit is required prior to the time that an industrial user is allowed to connect to Brigham City's system pursuant to Part 1 of the standards. The permitting procedure is described in Section 33 of the Pretreatment Program of Brigham City. Permits issued by Brigham City contain restrictions and conditions in accordance with the pretreatment

program and specifically Part 5 of the Standards. Permit transfers are prohibited, unless approved in advance by the Waste Treatment Manager under Part 5.5 and discharge permits are issued for a specified period of not to exceed five years. Permits may be modified under Part 5.4 upon enactment of national categorical pretreatment standards and are further subject to modification by Brigham City where just cause exists. Brigham City's enablement to issue permits to deny or condition new or increased contributions of pollutants is found in Title 19, Chapter 5 of the Utah Code Annotated, 1953, as amended. Specifically, the provisions of Section 19-5-115(7) provide that any political subdivision of the State of Utah may enact and enforce ordinances or rules for the implementation of Chapter 5 of Title 19 which are not inconsistent with that chapter. Title 10 Chapter 8 of the Utah Code Annotated, 1953, as amended, authorizes Brigham City's City Council to adopt regulations for the orderly operation of Brigham City and generally to do all things and perform, or cause to be performed, all acts that are necessary desirable in the conduct of its affairs and in the operation of the property of Brigham City including its treatment facilities. Brigham City may require pretreatment of industrial and commercial wastes and sewage that would otherwise place an undue burden on the collection system or the treatment facilities of Brigham City. Brigham City has adopted ordinances enacting the Industrial Pretreatment Standards and Permitting Manual updated and revised, in order to comply with the requirements of 40CFR 403.8. The authority of Brigham City to adopt such an ordinance is found in 10-8-84 of the Utah Code Annotated, 1953, as amended. All operative provisions are contained in the Industrial Pretreatment Standards and Permitting and respective Sections of Brigham City's Pretreatment Program.

403.8(f)(1)(ii)

The authority to require industrial users to comply with national pretreatment standards, prohibitive discharge standards and local limits is based upon exactly the same sources as Brigham City's authority to deny or condition new or increased contributions of pollutants. The sources of authority are set forth in the preceding paragraphs.

403.8(f)(1)(iii)

Brigham City will control, through permit, the contributions to its treatment plant by each significant industrial user. Brigham City's enablement to enter into such permits is found in Title 19, Chapter 5, the Utah Code Annotated, 1953, as amended. Permits will be issued by Brigham City pursuant to the provisions of Brigham City's Industrial Pretreatment Standards adopted by the Brigham City Council by ordinance on the 2nd Day of December, 2011.

403.8(f)(1)(iv)

A user who is not in compliance with the requirements of the Wastewater and Pretreatment Ordinance concerning pretreatment standards is required to be in compliance within a stated time in order to enjoy the continued use of Brigham City's facilities. Compliance is required under Part 6 of the Ordinance. Parts 6 and 7 pertaining to reporting and monitoring for industrial users, provides requirements for sampling, self-monitoring, compliance schedules, submission of technical reports and the maintenance of appropriate records. Section 3 of Brigham City's Pretreatment Program contains self-monitoring requirements and procedures. Enabling authority for these rules, regulations

and the related permit are set forth in the preceding paragraphs.

403.8(f)(1)(v)

Authority to conduct all inspections, surveillance, or monitoring procedures necessary to determine compliance with applicable pretreatment standards and regulations is provided in Brigham City's Ordinance and in the applicable section of Brigham City's Pretreatment program. Provisions relating to monitoring, inspections, etc., are contained in Part 7 of the Wastewater/Pretreatment Standards of Brigham City. Sources of enabling authority are set forth in the preceding paragraphs. The control mechanism to assure pretreatment standards will be met is the permit issued by Brigham City to industrial users.

403.8(f)(1)(vi)

Brigham City may seek legal and equitable remedies for non-compliance with its pretreatment standards and requirements in accordance with the provisions of Parts 10, 11, and 12 of the Wastewater/Pretreatment Ordinance and pursuant to Brigham City's Enforcement Response Plan contained within Section 3.5 of Brigham City's Pretreatment Program. An injunction, including a temporary restraining order, will be available for violation of the pretreatment requirements pursuant to Utah Rules of Civil Procedures 65A. In addition to the foregoing, pursuant to Part 10.8 of the Wastewater/Pretreatment Standards, Brigham City may terminate, or cause to be terminated, sewage treatment service to any user for a violation of any provisions of the Wastewater/Pretreatment Standards. Violators are punishable by a fine of \$1,000.00 or more per day per violation in accordance with Part 10.6 of Brigham City Standards. Title 19, Chapter 5 provides

enabling authority which may be used by Brigham City through the state in seeking civil penalties not to exceed \$10,000.00 per day and criminal fines not exceeding \$25,000.00 per day against any person who wilfully or with gross negligence, discharges pollutants in violation of the provisions of Title 19, Chapter 5 or violates any conditions or limitations included in a permit issued pursuant thereto, etc. Part 10.7 of the Wastewater/Pretreatment Standards allows Brigham City to suspend sewer service to stop an actual or threatened discharge, which does or may present an endangerment to person or the environment or interference with Brigham City's facilities or a violation of its UPDES Permit. Damages are also available at common law for person injuring the property and facilities of Brigham City.

403.8(f)(1)(vii)

Confidentiality requirements are met in Part 8 of the Wastewater/Pretreatment Standards.

403.8(f)(2)(I)

Brigham City will implement the Pretreatment Program Requirements set forth in 40CFR 403.8 by issuing a discharge permit to all significant industrial users now connected or proposing to connect to the system and by identifying users which are subject to the pretreatment program through inspections, etc. The industrial waste survey is contained in Section 3 of Brigham City's Pretreatment Program. Industrial user identification, review, and permit development procedures are contained in Section 3 of the Program.

403.8(f)(2)(ii)

Each industrial user, when obtaining a permit, is required pursuant to Part 45 of

the Wastewater/Pretreatment Standards, to identify the character and volume of pollutants contributed to Brigham City's facilities by such industrial user. Disclosure includes the quantity and quality characteristics of the discharge together with the quality and specific nature of any pollutants in the discharge, which are limited by an federal, state or local pretreatment standards or requirements. Monitoring and testing by the industrial user or Brigham City may also provide for the identification of character and volume of pollutants contributed by such industrial users.

403.8(f)(2)(iii)

Provisions of the discharge permit issued to each industrial user and the permit conditions contained in Part 5.3 of the Wastewater/Pretreatment Standards, requires notification of each industrial user of the applicable pretreatment standards and requirements. Under Part 10.1 of the Standards, industrial users are notified of any violations of their wastewater discharge permit or any limitations or requirements contained in the Wastewater/Pretreatment Ordinance. The RCRA notification procedures are contained in Section 3 of the Pretreatment Program, along with other Brigham City notification procedures. The RCRA notice requirement is also set forth in the industrial wastewater discharge permit.

403.8(f)(2)(iv)

Each industrial user is required to comply with self-monitoring requirements and procedures contained in Section 3 of the Pretreatment Program and to submit appropriate self-monitoring and compliance reports as provided in the Permit, Program, and the Wastewater/Pretreatment Ordinance.

403.8(f)(2)(v)

Brigham City's Waste Treatment Superintendent and his representatives have authority to conduct random sampling and to analyze effluent from industrial users and to conduct surveillance inspection activities in order to identify, independent of information supplied by the industrial user, occasional and continuing non-compliance with pretreatment standards. Part 7.1 of the Wastewater/Pretreatment Standards allows Brigham City's Waste Treatment Manager or his representatives ready access at all reasonable times to all parts of the premises for the purpose of conducting such monitoring and inspections. Failure to allow admission to the premises may result in sewer services to those premises being discontinued pursuant to Part 10.8.

403.8(f)(2)(vi)

Brigham City's Waste Treatment Manager investigates non-compliance as recorded by the reports provided by industrial users. Non-compliance may be indicated by analysis, inspection and surveillance activities of Brigham City Sampling and change of custody procedures are contained in Section 3 of Brigham City's Pretreatment Program. Inspection and sampling provisions are contained in Part 7 of the Wastewater/Pretreatment Standards.

403.8(f)(2)(vii)

Participation, including annual publication of users violating the standards is provided through Brigham City's newspaper notification procedure contained in Section 3 of the Pretreatment Program and in accordance with the provisions of Part 9 of the Wastewater/Pretreatment Standards which provides a list of users significantly violating any pretreatment requirements or standards during the previous 12 months be published

annually in the newspaper with the largest general circulation within the boundaries of
Brigham City.

Very truly yours,

MANN, HADFIELD & THORNE
