Director

September 9, 2008

Mr. Harold R. Roberts
Executive Vice President – US Operations
Denison Mines (USA) Corp. (DUSA)
1050 17th Street, Ste. 950
Denver, CO 80225

Dear Mr. Roberts:

SUBJECT: September 3, 2008 DUSA Letter of Response to Request for Information (RFI); August 18, 2008 DRC RFI Letter regarding Sandbag Placement; August 11, 2008 DUSA Response Letter to RFI; August 6, 2008 DRC RFI Letter on Cell 4A Construction Quality Assurance Report; **Approval of DUSA Cell 4A Construction Quality Assurance Report** including Cell 4A Slimes Drain Sandbag Adjustments

We received and reviewed the subject DUSA letters above. These letters conveyed information by Compact Disks, drawings, and other materials which were compared to the requests made by DRC letters dated August 18, 2008 and August 6, 2008. The issues raised by the DRC letters have been resolved by these submittals. Therefore, the *Cell 4A Construction Quality Assurance Report* including the DUSA Cell 4A slimes drain sandbag adjustment documentation are **hereby approved**.

This accomplishment by DUSA is a major step towards receiving operation approval for use of Cell 4A as outlined in our letter of July 29, 2008. It appears that the remaining item to be completed is DUSA's submittal and our approval of the *Cell 4A BAT Monitoring, Operations and Maintenance Plan*.

If you have any questions on the above, please contact Mr. David Rupp of DRC.
