Re: January 4, 2008 Request to Convert 11e.(2) Disposal Cell to Class A South Cell for Low-Level Radioactive Waste (LLRW) Disposal: **Completeness Review.**

Dear Mr. Rogers,

We have reviewed your January 4, 2008 application to amend your Radioactive Materials Licenses, Nos. UT 2300249 (LLRW) and UT 2300478 (11e.(2) waste), and your State Ground Water Quality Discharge Permit (No. UGW450005). The proposed changes include conversion of the western and open portion of the existing 11e.(2) Cell into a LLRW Class A disposal cell. As proposed, the new design includes intimate juxtaposition of LLRW and 11e.(2) waste at the site; separated by a 6-foot thick vertical clay wall.

Your January 4, 2008 application has been reviewed by the URS Corporation on behalf and in coordination with DRC staff. Attached are the DRC Completeness Review (CR) findings dated November 25, 2008. Please revise the application, resolve all the issues raised, and re-submit so that review of your proposal may move forward.

If you have questions or concerns regarding the CR, or if you would like to schedule a meeting to discuss it with DRC and URS staff, please call Loren Morton at 536-4262.

We appreciate your continued cooperation.

Respectfully,

Loren B. Morton
