Next Meeting

Date

Suggested topics

For the communication discussion, we are interested in hearing from you whether or not you think the improved communication efforts are working – listservs, website, forum meeting, educational sessions, etc. In preparation for this, would you please take a look at our website (<http://www.radiationcontrol.utah.gov/EnSolutions/>) and let us know any feedback or suggestions you might have. Can you find things? Is the information clear? What thoughts/reactions do you have? Anything I receive before the meeting, I will compile and have ready for everyone to review.
