

**Tailings Management Plan  
Amended December, 2005  
Revised April, 2007  
for  
Shootaring Canyon Uranium Processing Facility**

The included Shootaring-TMP-2007-Revision.PDF file contains the Tailings Management Plan for the Shootaring Canyon Uranium Processing Facility – Revised 2007. There are multiple page sizes and both portrait and landscape orientations within the PDF format. Color figures are also used to convey information and features of the tailings facility. Therefore, the correct display, scaling, and printing of many pages in this document may require additional attention by the user, as well as large format printing equipment. The conversion to PDF format may also result in relatively minor distortion of figures and map scales.
