

UTAH RADIATION CONTROL BOARD

"Cavanagh Services Group, Inc. Radioactive Material Application Number UT 1800510"
Public Comment Response Document
June 6, 2008

The comment below was received during a comment period held May 3 through June 2, 2008.

Comment No. 1: EnergySolutions believes that the inclusion of Section 32 in License condition 10B may be misconstrued as permission to manage radioactive materials on EnergySolutions property. The commenter asked that this area of use be removed from the license.

Response No. 1: Cavanagh Services Group concurs with removing the specified location from the license application. The specified area may not be used by Cavanagh Services Group for possession of radioactive material and the draft license will be revised accordingly.
