

Concrete Processing:

11.12-2

EMISSION FACTORS

Figure 11.12-1. Typical Concrete Batching Process.

10/01

In concrete processing operations, dust can be generated at a number of points:

- Delivery and storage of sand and gravel materials,
- The filling of cement and cement supplements in storage silos,
- The mixing of materials in a weigh hopper then in mixing plant, and/or a truck,
- The delivery of the materials by truck.
