

Utah Division of Air Quality New Source Review Section

Form 1 Oil and Gas GAO General Information

Application to be subject to a General Approval Order

General Approval Order (GAO) letter MUST BE ISSUED BEFORE ANY CONSTRUCTION OR INSTALLATION

CAN BEGIN. This is not a stand alone document. Please refer to R307-401-19 for more information on requirements of the specified information below. Please print or type all information requested. All outlined information must be accurate and completed. If you have any questions, contact the DAQ at (801) 536-4000 and ask to speak with a New Source Review Engineer. Written inquiries may be addressed to: Division of Air Quality, New Source Review Section, P.O. Box 144820, Salt Lake City, Utah 84114-4820.

(For DAQ Use Only) Fees Paid:

General Owner and Source Information		
1. Company name and address:	2. Company contact for environmental matters:	
Phone Number: () Fax Number: ()	Phone Number: () Fax Number: () E-mail address:	
3. Source name and address (if different from above):	4. Owner's name and address:	
Phone Number: () Fax Number: ()	Phone Number: () Fax Number: () E-mail address:	
 Property Universal Transverse Mercator (UTM) coordinates, including System and Datum: 	6. County where the source is located in:	
Easting: Northing:		
System: Datum:	7. Standard Industrial Classification (SIC) code:	
8. Source description:	9. API #(s) associated with source:	
10. Identify any current Approval Order(s) for the source:		
AO#Date	AO#Date	
11. GAO number the source will be applicable to: DAQE-AN Date issued://		
12a. Please confirm the following general information:		
 The source is not a Major Source as defined in R307-101-2. The source has criteria pollutant emissions below the thresholds outlined in Table 1 of R307-410-4. The source has HAP emissions below the thresholds outlined in Table 2 of R307-410-5. The source is not subject to the offset requirements contained in R307-403-5 or R307-420. 		

12b. Please confirm the following site-specific information:

1. The source is expected to have a throughput of crude oil and condensate combined less than or equal to 50,000 barrels per year. 2. The source will capture all produced gas (not a wildcat well).

3. The source will not be within 100 meters of a residential or commercial business building or structure.

To the best of my knowledge and belief, the information and data submitted in and with this application is true, accurate and complete, based on reasonable inquiry made by me.
