

**NOTICE OF DATA REQUEST FOR CLEAN WATER ACT  
SECTION 305(b) STATE WATER QUALITY ASSESSMENT  
INTEGRATED REPORT 2014**

The Division of Water Quality (DWQ) of the Utah Department of Environmental Quality will be assessing the waters of the State (streams and lakes) to determine their support of designated beneficial uses for the 2014 Integrated Report. The Integrated Report includes the 305(b) assessment report and the 303(d) list of impaired waters. Beneficial uses include potential source of drinking water, primary and secondary contact recreation, aquatic life, and agriculture.

DWQ monitoring teams have collected water quality data over several years to be used for evaluating stream and lake water quality. To assist the DWQ in making assessments, we are soliciting any additional water quality data from individuals or organizations. Data requirements and assessment methods are described in Part 1 of the 2010 Integrated Report. The deadline for data submittal for the 2014 Integrated Report is March 22, 2013. We recommend that data be submitted as soon as possible and that it be submitted in electronic format if possible. For questions or comments, please contact Emilie Flemer at 801-536-4105 or e-mail at [eflemer@utah.gov](mailto:eflemer@utah.gov). Data can be submitted to:
