**Hazardous Waste Inspection
Satellite Accumulation Checklist
<55 gallons**

INSPECTION ITEM	CITATION	COMMENTS
Is the satellite accumulation area at or near the point of generation?	R315-262-15(a)	
Is the satellite area under the control of the operator of the process generating the waste?	R315-262-15(a)	
Does the generator have the accumulation container labeled with the words "hazardous waste"?	R315-262-15(a)(5)(i)	
The generator can not store more than 55 gallons of hazardous waste or 1 quart of acutely hazardous waste at the satellite accumulation area.	R315-262-15(a)	
Are the containers in good condition, and being managed in a way so it does not leak or spill?	R315-262-15(a)(1)	
Is the hazardous waste stored in containers that are compatible with the waste?	R315-262-15(a)(2)	
Is the accumulation container being maintained in a closed condition except when waste is being added or removed, or when temporary venting is necessary for proper operation of equipment or to prevent dangerous situations such as pressure buildup?	R315-262-15(a)(4)	
Does the generator have the accumulation containers marked with an indication of the hazards of its contents?	R315-262-15(a)(5)(ii)	
Is the generator correctly labeling and moving hazardous waste, in excess of the 55 gallon or 1 quart limits, to a 90-day (LQG) or 180-day (SQG) storage area within 72 hours of exceeding the limit?	R315-262-15(a)(6)(i)
