Data Monitoring and Recording System

The following table lists the tag names for the parameters that will be monitored/calculated and recorded in the facility data archiving system. The parameters in the table must be monitored by the facility control system without interruption, with the value of each parameter evaluated at least once every 15 seconds and the average value of each parameter calculated and recorded at least every 60 seconds in accordance with 40 CFR§63.1209(b)(3).
