

ATTACHMENT II-2
SITE SECURITY PLAN

1.0 SECURITY PLAN

The Clean Harbors Grassy Mountain facility (CHGM) is in the sparsely populated Great Salt Lake Desert, with the nearest residence located approximately 35 miles away. Access to the facility is from the south via a county road with access to Interstate 80.

The entire active portion of the facility is enclosed with a six-foot high chain link fence topped with barbed wire. The fence layout is shown in Attachment II-1, Facility Plan View Drawing. CHGM shall maintain the fence in good repair and prevent erosion from creating access underneath the fence.

Twelve gates are strategically located around the compound perimeter. CHGM shall keep all gates locked when they are unattended or not observable by facility or contract personnel as shown in Attachment II-1. Waste Receiving office personnel shall provide access through the Main Gate. Communication to the Waste Receiving office is available with a hand-held radio, cell phone, or a telephone located adjacent to the main gate.

CHGM shall maintain lighting throughout key areas of the facility to facilitate inspection by facility personnel and safe processing of wastes.

CHGM shall post signs with the words “DANGER – UNAUTHORIZED PERSONNEL KEEP OUT” on the gates and the fence-line of the facility perimeter. The signs shall be in English and posted at intervals of no more than 120 feet. They shall be legible from a distance of at least 25 feet and shall be observable from any approach to the facility.
