

Emergency Controls R315-15-9

WASTE MANAGEMENT
& RADIATION CONTROL

Leonardo Calcagno
Environmental Scientist, Utah DEQ, DWMRC

April 2023

Utah's Used Oil Recycling Program

Immediate action

- To minimize the threat to human health and the environment
 - Stop and contain release
 - Clean up and manage released material
 - Repair/replace used oil tanks, containers, ancillary equipment (if needed)

Immediate action

- Notify the Utah State Department of Environmental Quality
 - 24-hour Answering Service (801) 536-4123
 - Releases >25 gallons
 - Smaller releases posing potential threat to human health or environment

Immediate action

- Other notifications
 - National Response Center (Air, rail, highway, or water transporter)
 - Director, Office of HM Regulations, DOT (Washington, D.C.)
 - Notify as required by 33 CFR 153.203 for oil and hazardous substances

Emergency Control Variance

- Used oil transporter permit and used oil handler certificate requirement
- US EPA identification number requirement
- For used oil transporters
- Until release no longer presents an immediate hazard to human health or the environment

Release clean-up

- Clean up (may required to US EPA Regional Screening Level standards)
- Released material, residue, or contaminated soil, water or other material
- Until no longer a hazard to human health or environment
- At the expense of responsible person

Reporting

- Within 15 days after any reportable release of used oil
 - Submit written report to Director
 - Person's name, address, and telephone number
 - Date, time, location, and nature of the incident
 - Name and quantity of material(s)
 - Extent of injuries (if any)
 - Assessment of actual or potential hazards (where applicable)
 - Estimated quantity and disposition of recovered material
