Until such time as this permit expires or is modified or revoked, the permittee is authorized to operate a large underground wastewater disposal system in conformance with all the requirements, limitations, and conditions set forth in Utah Administrative Code R317-5, with the attached schedules as follows:

SCHEDULE A

Waste Disposal Limitations:

1. The permittee is authorized to operate and maintain a large underground wastewater disposal system (LUWDS) that has been constructed in accordance with plans and specifications approved by the Division of Water Quality and with the following conditions:
   a. System type
      - Conventional Gravity;
      - Conventional with Pump-to-Gravity;
      - Pressure Distribution;
      - Alternative (describe)
   b. Maximum Daily Design Flow of: 7,500 gallons per day
   c. Components of wastewater disposal system (check all that apply):
      - RecirculatingTank
      - GreaseTrap
      - PumpTank w/Floats
      - Control Panel
      - Trenches
      - DeepTrench
      - Bed
      - Other (describe)
      - Septic Tanks; 10,000 gal
      - Distribution Box
      - Pressure Distribution
      - Drip Irrigation
      - Enhanced Trt Unit
      - Ratcheting Valve Box
      - Mound
      - 800 ft X 6 ft sidewall = 9,600 sq. ft.
   d. Drainfield media
      - Gravel;
      - Gravelless Chambers
   e. Effluent parameters will meet R317-4 for domestic wastewater or additional treatment may be required.

2. Discharge of untreated or partially treated sewage or septic tank effluent directly or indirectly onto the ground surface or the surface waters of the state constitutes a public health hazard and is prohibited. This permit does not relieve the permittee from responsibility for compliance with any other applicable federal, state, or local law(s), rule(s) or standard(s).

3. No cooling water, air conditioner water, ground water, oil, hazardous materials, roof drainage, storm water runoff, or other aqueous or non-aqueous substance which is, in the judgment of the Division, detrimental to the performance of the system or to groundwater, shall be discharged into the wastewater treatment system.

4. No activities shall be conducted that could cause an adverse impact on existing or potential beneficial use of groundwater.

SCHEDULE B

Required Servicing and Inspections:

1. ☑ Annually ☐ Semi-Annually (every 6 months) ☐ Other (specify)

2. All servicing and inspections must be conducted by a certified maintenance person per R317-11. Level 2 is required for conventional systems and level 3 for all other LUWDS.

Name of person performing maintenance on this system: Dave Brooks

☑ Level 2 ☐ Level 3

Note: if this person is replaced with another maintenance person, the owner must notify the Division within 30 day of change.
3. If sample results exceed Operating Parameters (other than Flow of wastewater) in table titled "Minimum Inspection Frequency, Components, and Effluent Sampling Parameters", report to the Division within 5 days and follow rules in R317-5-3.9.

**Inspection Components**

<table>
<thead>
<tr>
<th>TYPE OF SYSTEM</th>
<th>Measure sludge/scum levels, pump when necessary: * Septic Tank * Pump Tank * Grease Trap</th>
<th>Inspect and clean when necessary: * Pump Floats * Control Panel * Pump Filter</th>
<th>Flush/clean pressure laterals; inspect for ponding or surfacing in dispersal area; reset squirt height for equal pressure</th>
<th>Manufacturers Recommendations: * Recirc Tank * Pre-Treatment Unit * Misc</th>
</tr>
</thead>

**Reporting**

Monitoring, maintenance practices, solids handling and results shall be reported on Division approved forms and must be submitted by **August 1, following the "reporting year" period of July 1 to June 30.**

Mail or email Reports to (permitting agency): Division of Water Quality, c/o LUWDS, PO Box 144870, Salt Lake City, UT 84114-4870

Office: 801-536-4380 Fax: 801-536-4301 Email: LUWDS@utah.gov

**SCHEDULE C**

**Special and General Conditions:**

1. All septage/sludge shall be managed by a licensed sewage scavenger (pumper) as defined in R317-550.
2. Any observations of excessive kitchen wastes, surfacing sewage, etc., must be reported to the Division within 5 working days.
3. The permittee must maintain all treatment and control facilities in good working order and in conformance with permit requirements.
