BACKGROUND

The Chamberlain Investment Corporation (CIC) is a small family business with plans to make use of four wells on the property. There are 3 hot mineral water wells with various temperatures and 1 cold well. Well #1 is 134 to 138 degrees F and Well #2 is 132 degrees F with potential future plans for campground unit with grottos. The plan is to use Well #4, which is 134 degrees F for a heat source to heat 1 or more greenhouses. The water will be contained in a circular loop which puts the water back into the well. Well #3 has a Fresh Water temperature of 60 degrees F and will be used for irrigation purposes for the greenhouse or greenhouses. The State Engineer's office has issued a non-consumptive water right to CIC. This water right cannot exceed 1.00 cubic feet per second (.65 million gallons a day or 724 acre feet annually).

The flow from the grottos and swimming pools will enter a concrete serpentine manmade creek to decrease the chlorine and increase the dissolved oxygen before the discharge water enters Salt Creek. It has a Standard Industrial Classification (SIC) code of 7999, for Amusement and Recreation Services, not elsewhere classified.
