DIVISION OF WATER QUALITY  
UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY  
PUBLIC NOTICE OF NEW UPDES PERMIT

**PURPOSE OF PUBLIC NOTICE**

The purpose of this public notice is to declare the State of Utah's intention to issue a Utah Pollutant Discharge Elimination System (UPDES) Permit under the authority of the Utah Water Pollution Control Act, Section 19-5-104 and 107, Utah Code Annotated 1953, as amended. Said "Permit" refers to UPDES Permit and the Fact Sheet Statement Of Basis (including the Total Maximum Daily Loads (TMDL's)) if applicable, as per Section 303 (d) of the Federal Clean Water Act (CWA).

**PERMIT INFORMATION**

PERMITTEE NAME:	Garland City
MAILING ADDRESS:	PO Box 129, Garland, UT 84312
TELEPHONE NUMBER:	(435) 257-3118
FACILITY LOCATION:	1206 South 1050 East, Garland, UT 84312
UPDES PERMIT NO.:	UT0026034
OUTFALLS:	001
RECEIVING WATERS:	Malad River

**BACKGROUND**

The Garland City Wastewater Treatment Plant (WWTP) is a new planned facility to be located at 1206 South 1050 East in Garland, Utah. Currently Garland City owns and operates a wastewater collection system that services approximately 2750 people with a mix of residential and commercial properties, public schools, businesses, and community meeting houses. Garland City entered an interlocal agreement with the City of Tremonton as early as 1962 for treatment of wastewater. The most recent agreement had ended in 2015 and Garland is currently operating around an automatic 2-year renewal. Garland city has decided to move forward with constructing a new wastewater plant because a final planning report determined that constructing the new wastewater treatment plant would be more economical, improve local growth, and restore value back to the municipality.

The treatment process would be designed to receive and average flow of 0.45 MGD and a peak flow of 0.90 MGD. The facility will have a preliminary treatment process consisting of an in-channel automated screen with bagging mechanism, a manual bypass bar rack and a vortex grit chamber, classifier and screw conveyor. The secondary treatment process will consist of biological assimilation of organics through aerobic cellular metabolism. Phosphorous will be removed from the wastewater during secondary clarification. Onsite waste activated sludge will be stabilized, thickened, and reduced through endogenous respiration. The facility will utilize ultra-violet light (UV) disinfection. Waste by-products, including screenings and dewatered biosolids, will be hauled to the Box Elder County Landfill.

**PUBLIC COMMENTS**

Public comments are invited any time prior to the deadline of the close of business on **January 27, 2020**. Written public comments can be submitted to Leanna Littler, UPDES Surface Water Section, Utah Division of Water Quality, PO Box 144870, Salt Lake City, Utah 84114-4870 or by email at [lnlittler@utah.gov](mailto:lnlittler@utah.gov). After considering public comment, the Utah Division of Water Quality may execute the permit issuance, revise it, or abandon it. The permit is available for public review under <https://deq.utah.gov/water-quality/water-quality-public-notices>. If internet access is not available, a copy may be obtained by calling Leanna Littler at (801) 536-4397.
