Hydraulic Oil Cleanup Project
Former Firestone property at 253 West 9000 South Street, Sandy, Utah

Notice of Corrective Action

A subsurface site investigation at the former Firestone property has identified oil-impacted soil and groundwater. The release was reported to the Division of Water Quality (DWQ) on August 26, 2020.

A Corrective Action Plan (CAP) has been developed to properly address the oil-impacted soil and groundwater.

Site Description

The facility (site) is located at 253 West 9000 South Street, Sandy, Utah. A release of petroleum (hydraulic oil) to the subsurface soil and groundwater was documented during a subsurface investigation in August 2019 in the vicinity of several subsurface hydraulic lifts. The building is planned to be removed and the site redeveloped.

Cleanup Measures

In order to protect human health and the environment, the property owner representative, WDG East Sandy LLC, has agreed to the following corrective action measures:

If encountered, petroleum-impacted soil above the Utah Initial Screening Levels (ISL) will be removed from the site. The soil will be disposed of at a regulated disposal facility. In addition, groundwater sampling and monitoring will be conducted if groundwater contamination exceeds Utah groundwater ISL standards upon completion of the soil excavation work. A UPDES permit and authorization from Sandy City Public Works Department will be obtained prior to discharge of the treated water to the Sandy City Storm Drain System. Groundwater encountered during soil removal and site development work, including construction of utility corridors and storm water systems, will be collected, stored, treated, tested and discharged in accordance with applicable laws and permits.

Public Comment

The public is invited to review and comment on the proposed Corrective Action plan (CAP). At the conclusion of the comment period, the CAP will either be approved as presented or modified based on public feedback.

Public comments are invited any time prior to **October 10, 2020**. Written comments may be directed to:

Division of Water Quality
P.O. Box 144870
Salt Lake City, UT 84114-4870

All comments received prior to **October 10, 2020** will be reviewed. A public hearing may be held if written requests are received within the first 15 days of this public comment period that demonstrate significant public interest and substantive issues to warrant holding a hearing.

For More Information

The CAP and related reports are available for review online at:

<https://deq.utah.gov/public-notices-archive/water-quality-public-notices>

The documents are available for review during normal business hours at the Division of Water Quality, 195 N. 1959 W., Salt Lake City.
