BACKGROUND

The applicant is proposing to widen a 1.57-mile section of Main Street/Crossroads Boulevard from 3 lanes to 5 lanes. The proposed 74-foot paved roadway width would include two 12-foot travel lanes in each direction, a 12-foot center turn lane, 5-foot bike lanes in each direction, and 2-foot buffers between car and bike lanes. In addition to the paved width, the project would include a 2-foot curb and gutter, 7-foot planters, and 5-foot sidewalks on each side of the roadway, for a total proposed width of 102 feet. The proposed roadway improvements would also include reconstruction of the bridge over the Jordan River and the redesign of 3 intersections. The overall project purpose is to improve regional mobility. The applicant believes there is a need to provide infrastructure to meet the growing population of Saratoga Springs and Lehi City. The project would result in permanent impacts to approximately 0.88 acre of emergent marsh wetlands, 0.27 acre of scrub-shrub wetlands and 2,289 linear feet of drainage channel.
