DIVISION OF WATER QUALITY  
UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY  
PUBLIC NOTICE TO ISSUE A UPDES GENERAL PERMIT FOR TREATED  
GROUNDWATER

**PURPOSE OF PUBLIC NOTICE**

The purpose of this public notice is to declare the State of Utah's intention to issue a Utah Pollutant Discharge Elimination System (UPDES) General Permit for Treated Ground Water under authority of the Utah Water Pollution Control Act, Section 19-5-104(9) and 107(2), Utah Code Annotated 1953, as amended,

**PERMIT INFORMATION**

PERMITTEE NAME: Jones Excavating (Jordan Lynch)  
MAILING ADDRESS: 5633 Axel Park Road West Jordan, UT 84081  
PROJECT LOCATION: Latitude 40.768420°, Longitude -112.0022764°  
UPDES PERMIT NO.: UTG790092  
WATERCOURSES: Jordan River via storm drain at 150 S 5600 W Salt Lake City,  
UT 84104

**BACKGROUND**

Jones Excavating is requesting coverage under the UPDES General Permit for Treated Ground Water to discharge groundwater to the Jordan River via storm drain. Barium, total phosphorus, and gasoline range organics were identified in the permittee's Notice of Intent (NOI) as pollutants within the groundwater. These pollutants are not included as a pollutant requiring sampling in the General Permit for Treated Ground Water. In order to ensure water quality is protected, the Utah Division of Water Quality (DWQ) is issuing this public notice to add barium, total phosphorus, and gasoline range organics sampling with an associated effluent limitation of 0.1 mg/L<sup>1</sup> to UTG790092.

---

<sup>1</sup> Limits are derived using Utah Water Quality Standards found in R317-2-14.
