PUBLIC NOTICE

PURPOSE OF PUBLIC NOTICE

The purpose of this public notice is to declare the State of Utah's intention to grant a variance to the Technology Based Phosphorus Effluent Limit compliance to North Davis Sewer District (North Davis). Pursuant to UAC R317-1-3.3 and corresponding provisions of the Utah Water Quality Act.

BACKGROUND

The North Davis Sewer District wastewater treatment plant (NDSW) submitted a variance request, dated December 26, 2017, to the Utah Division of Water Quality seeking a variance to the TBPEL implementation. The Variance Request is based on NDSW's assertion that removing Farmington Bay as a downstream use by relocating the discharge point to the Gilbert Bay side of the Antelope Island causeway will result in a net water quality benefit to the Great Salt Lake. In addition, NDSW is in the process of designing and constructing a new outfall to the Great Salt Lake and such improvements cannot be completed prior to January 1, 2020, despite NDSW's diligence.
