NAME: EXPEDITED SETTLEMENT OFFER FOR REMCO SUBDIVISION.

BACKGROUND

The Utah Pollutant Discharge Elimination System (UPDES) General Permit for Discharges from Construction Activities (Permit No. UTRC00000) authorizes owners and operators of construction activities that meet the requirements of Part 1 of this permit to discharge pollutants in accordance with specific effluent limitations and conditions. The owner and operator, Pratt Dimond, obtained coverage under this general permit on 4/18/2018 and was assigned permit number of UTR386015.

The Division conducted an inspection of the construction site on February 5, 2019 in response to a complaint. The following violations were discovered during the inspection: The site's SWPPP signage was down, and not visible from the public right-of-way, the SWPPP map was not updated to reflect the conditions on the ground, site inspections were not kept onsite, the downstream inlet the received runoff from the site was not protected, perimeter controls were missing or damaged, the right-of-way had sediment tracked into it, concrete spoils were dumped onsite, and equipment was washed down on the ground with no containment provided, and construction waste and debris was improperly disposed of.
