TELEPHONE NUMBER: (801) 799-4000
FACILITY LOCATION: 1365 West 2300 North, Salt Lake City, UT

BACKGROUND

The Salt Lake City Water Reclamation Facility (SLCWRF) was originally constructed in 1965 and serves the northern portion of Salt Lake County with a current resident population of approximately 200,000 people, with 51,121 sewer connections and multiple industries located within its service boundaries. Since initial construction, the facility has completed numerous upgrades, improvements and expansions. The current plant design monthly average flow is 56 million gallons per day (MGD). The majority of the plant effluent discharges through Outfall 003 directly to the Oil Drain Canal. The remaining effluent passes through thirty acres of wetlands on SLCWRF property constructed to provide year round habitat for waterfowl and other wildlife. The wetlands have a hydraulic design maximum of 5 MGD and after flowing through, the discharges are from nearby Outfall 001, also to the Oil Drain Canal.
