DIVISION OF WATER QUALITY
UTAH DEPARTMENT OF ENVIRONMENTAL QUALITY
PUBLIC NOTICE TO RENEW THE GENERAL PERMIT FOR DISCHARGES FROM SMALL
MUNICIPAL SEPARATE STORM SEWER SYSTEMS

PURPOSE OF PUBLIC NOTICE

The purpose of this public notice is to declare the state of Utah's intention to renew/reissue a Utah Pollutant Discharge Elimination System (UPDES) permit under authority of the Utah Water Quality Act, Section 19-5-104 and 107, Utah Code Annotated 1953, as amended. Said "permit" refers to UPES permit and the statement of basis, including the total maximum daily loads (TMDL's) if applicable, as per section 303 (d) of the Federal Clean Water Act (CWA).

PERMIT INFORMATION

PERMIT NAME: UPDES General Permit for Discharges from Small Municipal Separate Storm Sewer Systems (MS4s)

PERMIT NO: UTR090000

BACKGROUND

The Federal Clean Water Act requires that storm water discharges from certain types of facilities be authorized under storm water discharge Permits. (See 40 CFR 122.26.) The goal of the storm water permits program is to reduce the amount of pollutants entering streams, lakes and rivers as a result of runoff from residential, commercial and industrial areas. The original 1990 regulation (Phase I) covered municipal (i.e., publicly-owned) storm sewer systems for municipalities over 100,000 population. The regulation was expanded in 1999 to include smaller municipalities. This expansion of the program to include small MS4s is referred to as Phase II. This Permit covers new or existing discharges composed entirely of storm water from Phase II, or Small Municipal Separate Storm Sewer Systems (MS4) Permittees statewide.

The State of Utah was granted primacy in the National Pollutant Discharge Elimination System (NPDES) program by USEPA in 1987. In Utah, storm water discharge Permits are issued by the "Director". Utah's program is known as the Utah Pollutant Discharge Elimination System (UPDES) Program. The requirements of this Permit are intended to reduce the discharge of pollutants to the maximum extent practicable and meet water quality standards through the development and implementation of a Storm Water Management Program (SWMP).

This Permit serves as a re-issuance or replacement of the previous General Permit for Discharges from Small Municipal Separate Storm Sewers (MS4s), UTR090000, issued December 1, 2016, and last MODIFIED on February 26, 2020. This Permit is intended to cover new or existing discharges composed

entirely of storm water from MS4s required by the State to obtain a permit, of which there are 77 at the time of this Permit Renewal.

Since the most recent Permit Modification (February 26, 2020), some spelling edits, changes to grammar, minor language changes, sentencng restructuring, and formatting have been completed. These changes were made to improve readability and clarify the requirements of this permit. The majority of the permit remains unchanged from the most recent Modification.

Since the last public notice from February 24, 2021 to March 24, 2021, the Permit has been updated to ensure consistency with the requirements in 40 CFR 122.34 and 40 CFR 122.28 (d).

PUBLIC COMMENTS

Public comments are invited any time prior to of the close of business on **April 30, 2021**. Written public comments can be submitted to: Leanna Littler-Woolf, General Permitting Section, Utah Division of Water Quality, PO Box 144870, Salt Lake City, Utah 84114-4870 or by email at: lnlittler@utah.gov. After considering public comment the Utah Water Quality Board may execute the permit change, revise it, or abandon it. The permit and associated documents are available for public review under “Public Notices” at <https://deq.utah.gov/division-water-quality>. If internet access is not available, a copy may be obtained by calling Leanna Littler-Woolf at 801-536-4397.
