BACKGROUND

The Park City Spiro and Judge Tunnels were built in the late 1800s/ early 1900s to drain groundwater from mining activities. Now both tunnels are operated by Park City Municipal Corporation (PCMC) and water collected is used as a source of potable and raw water for Park City. In 2023 PCMC completed the construction of the Three Kings Water Treatment Plant (3Kings WTP) to provide drinking water for Park City and to satisfy the effluent parameters of this UPDES Permit No. UT0025461.

The Spiro Tunnel is located just southwest of 3Kings WTP, across Three Kings Drive. Judge Tunnel is located roughly 2.5 miles southeast of 3Kings WTP, at the end of Daly Drive. Both Tunnel discharges are piped to 3Kings WTP where they are combined. Once combined, they are treated by 3Kings WTP or discharged into the North Ditch. 3Kings WTP discharges/ bypasses into Pond 18. Thereafter, flows enter McLeod Creek and through diversion structures into East Canyon Creek and/or Silver Creek drainages.
