

APPENDIX I.AC - Storm Water Discharges Associated with Industrial Activity from Electronic and Electrical Equipment and Components, Photographic, and Optical Goods Manufacturing Facilities

A. Coverage of This Section.

1. Discharges Covered Under This Section. The requirements listed under this Part shall apply to storm water discharges from the following activities:

Table I.AC.1 – Sector AC: Electronic and Electrical Equipment and Components, Photographic, and Optical Goods Manufacturing Facilities

SIC Code	Activity Represented
3571 – 3579	Computer and Office Equipment
3812 – 3873	Measuring, Analyzing, and Controlling Instruments; Photographic and Optical Goods, Watches, and Clocks
3612 – 3699	Electronic and Electrical Equipment and Components, Except Computer Equipment

2. Sector Specific Limitations on Coverage. There are no additional limitations on coverage other than those listed in *Part I.C.*
3. Sector Specific Prohibition of Non-Stormwater Discharges. There are no additional prohibited non-stormwater discharges beyond those in *Part I.D* of this permit.

B. Sector Specific Control Measures and Effluent Limits.

There are no additional control measures and effluent limits beyond those in *Part III* of this permit.

C. Sector Specific Inspection Requirements.

There are no additional inspection requirements beyond those in *Part IV.A* of this permit.

D. Sector Specific Plan Requirements.

There are no additional Plan requirements beyond those in *Part VII.D* of this permit.

E. Monitoring Requirements.

1. Analytical Benchmark Monitoring. There are no analytical benchmark monitoring parameters for Sector AC facilities in this permit. Any additional monitoring and reporting requirements shall be based on the nature of activities at the facility and the facility stormwater discharges, in accordance with *Part V.D.2.*
2. Numeric Effluent Limitation Monitoring. There are no numeric effluent limitation parameters for Sector AC facilities in this permit. Any additional monitoring and reporting requirements shall be based on the nature of activities at the facility and the facility stormwater discharges, in accordance with *Part V.D.2.*
